Subject: WALLA WALLA Formal Investigation

Importance: High

To WALLA WALLA Investigation Panel:

This direction amends my previous email guidance of November 4, 2012 and hereby directs that a formal investigation be convened to investigate into the facts and circumstances surrounding the damage sustained by the propulsion drive motor #1A on the M/V WALLA WALLA on November 4, 2012 while at Eagle Harbor Maintenance Facility. Senior Port Engineer Elizabeth Nicoletti is designated as the Coordinator of Investigation Panel.

Please conduct the investigation in accordance with our current SMS policy and procedures (SMSM SAFE 0100). You will be assisted in your investigation by a representative of Cadick Corporation, a private consulting firm specializing in electrical power systems.

Please provide me a weekly update on the progress of your investigation.
