Skagit Transit
Dale O'Brien, Executive Director
600 County Shop Lane
Burlington, WA 98233

Dear Mr. O'Brien

The City of Sedro-Woolley offers its support to Skagit Transit for the request of Washington State DOT Consolidated Grant Program funding to expand fixed route transit services in Sedro-Woolley.

The Island and Skagit Coordinated Public Transit-Humans Services Transportation Plan identified the unmet transportation needs of the community, one such need is to increase and improve service levels.

Skagit Transit's project to expand services with an additional route in Sedro-Woolley which is coordinated with existing Route 300 will provide more frequent transit service inside and just outside the city limits. It will also provide more frequent and direct regional connections to Bellingham or Everett via the connector routes of 80X or 90X.

This expansion of services to Sedro-Woolley will be a valuable service to the transit dependent citizens in our community by providing more frequent trips, thereby reducing travel time and also by providing further access to regional transportation services.

We consider this service expansion request critical to better serve our community. You have our support for this project.

Sincerely,

CITY OF SEDRO-WOOLLEY

Mike Anderson, Mayor
