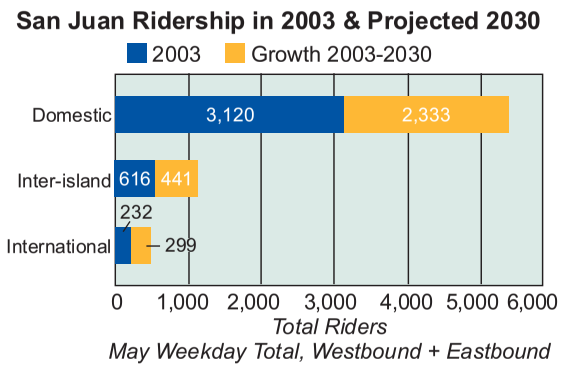
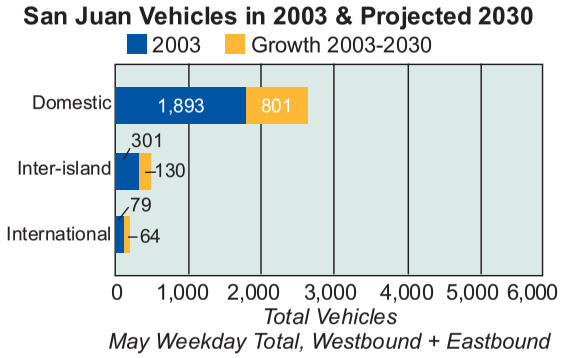
Washington State Department of Transportation

Washington State Ferries

Why is WSF improving the Anacortes Ferry Terminal?




- The facility cannot accommodate projected growth
- The terminal building is in poor condition and has limited customer amenities
- An additional drive-on slip is needed for efficient maintenance and operations
- Loading is difficult for pedestrians, persons with limited mobility and bicyclists
- Poor site circulation causes congestion and conflicts among vehicles, pedestrians and bicycles
- Pick-up/drop-off locations are inconvenient
- Security improvements are needed
