TABLE OF CONTENTS

Summary ..... **vii**
Study Approach vii
Baseline Conditions vii
Project Effects viii
Measures to Avoid or Minimize Effects ix
Unavoidable Adverse Effects x
Acronyms and Abbreviations ..... **xi**
Glossary ..... **xiii**
SECTION 1 Introduction **1-1**
What are the primary features of the Tukwila to Renton Project? 1-1
Why do we consider noise as we plan this project? 1-1
What are the key points from this report? 1-2
What measures are proposed to avoid or reduce impacts? 1-2
What will happen if we adopt the No Build Alternative? 1-3
SECTION 2 Project Description **2-1**
What is the intent of the Tukwila to Renton Project? 2-1
What are the details of the Tukwila to Renton Project? 2-1
I-405 from I-5 to East of SR 181 2-3
I-405 at SR 181 Interchange 2-5
I-405 from East of SR 181 to SR 167 Interchange 2-7
SR 167 from SW 43rd Street On-ramp North to SW 27th Street 2-9
SR 167 from SW 27th Street to I-405 2-11
I-405 Interchange with SR 167 2-13
I-405 from East of SR 167 Interchange to North of S 5th Street 2-17
I-405 from S 5th Street to SR 169 2-19
Changes to Renton Hill Access 2-22
What are the construction methods and schedule for implementation? 2-23
Construction Methods 2-23
Schedule 2-24
Does this project relate to any other improvements on I-405 or connecting highways? 2-24

What is the No Build Alternative? 2-26

SECTION 3 Study Approach 3-1

What are sound and noise? 3-1

What are typical sound levels and what affects them? 3-2

Sources of Sound 3-2

The Effect of Distance 3-3

The Effect of Terrain and Shielding 3-3

How are sound levels described? 3-5

What are the effects of loud noises? 3-5

What project coordination was performed? 3-5

What criteria are used to evaluate the project's potential effects on the acoustical environment? 3-6

Operational Noise Standards 3-6

Construction Noise Standards 3-8

How was the noise study performed? 3-8

Traffic Noise Prediction 3-9

Analysis of Project Effects 3-10

Noise Mitigation Analysis 3-10

How was construction noise analyzed? 3-11

SECTION 4 Baseline Conditions 4-1

What is the study area for the noise analysis? 4-1

Where are the modeled noise receptor locations? 4-3

What are the modeled noise levels? 4-20

SECTION 5 Project Effects 5-1

Will the project affect noise levels in the study area? 5-1

Build Alternative 5-1

No Build Alternative 5-1

How do the Baseline Conditions, No Build, and Build Alternatives differ? 5-1

Will project construction temporarily affect noise levels? 5-2

Noise Sources during Construction 5-2

Range of Noise from Construction Equipment 5-4

Does the project have other effects that may be delayed or distant from the study area? 5-4

SECTION 6 Measures to Avoid or Minimize Effects 6-1
How will effects from construction noise be minimized? 6-1
How can effects from traffic noise be minimized? 6-2
Traffic Management Measures 6-2
Land Acquisition for Noise Buffers or Barriers 6-3
Roadway Realignment 6-3
Noise Insulation of Buildings 6-3
Noise Barriers 6-3
SECTION 7 Vibration 7-1
What is vibration? 7-1
How is vibration analyzed? 7-1
What are the potential effects of vibration? 7-1
How can the potential effects be minimized? 7-2
SECTION 8 Unavoidable Adverse Effects 8-1
Does the project cause any substantial adverse effects that cannot be avoided? 8-1
SECTION 9 References 9-1
GIS data sources 9-1
Text references and verbal communications 9-2

EXHIBITS

Exhibit 2-1: Project Features, Sheet 1 2-2
Exhibit 2-2: Project Features, Sheet 2 2-4
Exhibit 2-3: SR 181 Interchange Improvements 2-5
Exhibit 2-4: Project Features, Sheet 3 2-6
Exhibit 2-5: Project Features, Sheet 4 2-8
Exhibit 2-6: Project Features, Sheet 5 2-10
Exhibit 2-7: Project Features, Sheet 6 2-12
Exhibit 2-8: Freeway to Freeway Ramps in Reconstructed I-405/SR 167 Interchange 2-13
Exhibit 2-9: Rendering of I-405/SR 167 Interchange Improvements 2-14
Exhibit 2-10: Split-diamond Interchange at Lind Avenue and Talbot Road 2-15
Exhibit 2-11: Project Features, Sheet 7 2-16
Exhibit 2-12: Project Features, Sheet 8 2-18
Exhibit 2-13: Mill Avenue Design Option for Local Access to Bronson Way 2-20
Exhibit 2-14: Main Avenue Design Option for Local Access to Bronson Way 2-21
Exhibit 2-15: New Local Access for Renton Hill 2-22
Exhibit 3-1: Typical Noise Levels 3-2
Exhibit 3-2: Noise Barrier Effectiveness 3-4
Exhibit 3-3: FHWA Noise Abatement Criteria 3-7
Exhibit 3-4: Maximum Permissible Environmental Noise Levels 3-7
Exhibit 3-5: Allowed Exceedences of the Maximum Permissible Noise 3-8
Exhibit 4-1: Noise Study Area 4-1
Exhibit 4-2: Modeled Noise Levels at Receptors, as shown on Sheet1 of 7 4-4
Exhibit 4-3: Modeled Noise Receptor Locations - Sheet 1 of 7 4-5
Exhibit 4-4: Modeled Noise Levels at Receptors, as shown on Sheet 2 of 7 4-6
Exhibit 4-5: Modeled Noise Receptor Locations - Sheet 2 of 7 4-7
Exhibit 4-6: Modeled Noise Levels at Receptors, as shown on Sheet 3 of 7 4-8
Exhibit 4-7: Modeled Noise Receptor Locations - Sheet 3 of 7 4-9
Exhibit 4-8: Modeled Noise Levels at Receptors, as shown on Sheet 4 of 7 4-10
Exhibit 4-9: Modeled Noise Receptor Locations - Sheet 4 of 7 4-11

Exhibit 4-10: Modeled Noise Levels at Receptors, as shown on Sheet 5 of 7 4-12
Exhibit 4-11: Modeled Noise Receptor Locations - Sheet 5 of 7 4-13
Exhibit 4-12: Modeled Noise Levels at Receptors, as shown on Sheet 6 of 7 4-14
Exhibit 4-13: Modeled Noise Receptor Locations - Sheet 6 of 7 4-17
Exhibit 4-14: Modeled Noise Levels at Receptors, as shown on Sheet 7 of 7 4-18
Exhibit 4-15: Modeled Noise Receptor Locations - Sheet 7 of 7 4-19
Exhibit 5-1: Typical Construction Noise Levels.....5-3
Exhibit 6-1: Evaluated Noise Barriers.....6-5
Exhibit 6-2 Renton Nickel Noise Barrier East 5 Modification.....6-8
Exhibit 6-3: Location of Noise Barrier 8 6-10
Exhibit 6-4: Allowed Barrier Area for Noise Barrier 8 6-11
Exhibit 6-5: Allowed Barrier Area for Noise Barrier 9 6-12
Exhibit 6-6: Location of Noise Barriers 10A and 10B 6-13
Exhibit 6-7: Allowed Barrier Area for Noise Barrier 10 6-15
Exhibit 6-8: Allowed Barrier Area for Noise Barrier 12 6-17
Exhibit 6-9: Allowed Barrier Area for Noise Barrier 13 6-18

APPENDICES

APPENDIX A Noise Measurement and Model Validation Data

APPENDIX B Noise Barrier Analysis

APPENDIX C SR 515 Improvement Project Noise Analysis
