CONTENTS

	Page
Nomenclature for Circular Curves	5
Circular Curve Equations	7
Figure I–Simple Circular Curve	8
Table I–Deflections and Chords for Even Radius Curves	9–12
Table II–Functions of a 10,000 ft. Radius Curve	13–146
Table III–Tangent Offsets for a 10,000 ft. Radius Curve	147–152
Table IV–Arc Lengths for Radius = 1	153
Table V– Degrees of Curvature for Various Feet of Radii	154
Table VI–Feet of Radii for Various Degrees of Curvature	154
Table VII–Minutes and Seconds in Decimals of a Degree	155–156
Table VIII–Inches in Decimals of a Foot	157–158
Table IX–Steel Tape Temperature Correction	159–160
Table X–Steel Tape Working Tensions	160
Table XI–Map Scales and Equivalents	161
Table XII–Engineering Constants and Measuring Equivalents	162–163
Table XIII–Deformed Steel Bars for Reinforced Concrete	163
VERTICAL CURVE EQUATIONS	
Standard	164
Slide Rule Method	165
Alternate Slide Rule Method	165
High Point of a Summit Curve or Low Point of a Sag Curve	165–166
Unsymmetrical Curves	167–168
Determining Intersection of Grades	168
Determination of Distance from Finished Shoulder to Subgrade Shoulder and Slope Equivalents	169
Pile Driving Formulas	170
TOWNSHIP AND SECTION SUBDIVISIONS	
Figure II–Typical Township	171
Figure III–Typical Section	172
Figure IV–Legal Description of a Section	172
Figure V–Acreage and Standard Dimensions	173

CONTENTS—Continued

	Page
Balancing and Adjusting a Traverse by the Compass Rule	174–175
Balancing a Government Meander Line by Swing Method	176
State Traverse Between Meander Corners	177
Government Meander Notes	177
Balanced Government Meander Line	178
Computation of Areas by Double Meridian Distances	178–179
Figure VI–Areas of Plane Figures	180
Figure VII–Surfaces and Volumes of Solids	181–182
Figure VIII–Centers of Gravity of Ordinary Plane Figures	183–184
Trigonometric Functions	185
Trigonometric Laws	186
Signs of Trigonometric Functions for All Quadrants	187
Trigonometric Solutions of Triangles	188
Table XIV–Natural Tangents, Co-Tangents, Sines and Co-Sines	189–211
Table XV–Natural Secants and Co-Secants	212–223
Table XVI– Functions of Numbers	224–233
Criss Cross Method of Computing Roadway Cross Sections	234–235
Criss Cross Method for Determining the Area of Any Prism	237–239
Triangulation to Circumvent an Obstruction Using an Isosceles Triangle	240
Determining Radii of Sharp Curves by Field Measurements	241
Example of Transit Notes	242
Example of Level Notes	243
Example of Cross Section Notes	244
Example of Slope Staking Notes	245
Example of Structure Notes for Drainage	246
CIRCULAR CURVES	
Laying Out Circular Curves	247–249
Tangent Offsets	249
Adjustments of Instruments	250–252
Specifications for Traverse, Triangulation, and Leveling	253
Survey Orders of Accuracy	254
Word Index	253–256
