Chapter 1 General Information 1-1

1.1 Manual Description 1-1
1.1.1 Purpose 1-1
1.1.2 Specifications 1-2
1.1.3 Format 1-2
1.1.4 Revisions 1-4

1.2 Bridge and Structures Office Organization 1-5
1.2.1 General 1-5
1.2.2 Organizational Elements of the Bridge Office 1-5
1.2.3 Unit Responsibilities and Expertise 1-9

1.3 Roles, Responsibilities and Procedures 1-10
1.3.1 General 1-10
1.3.2 General Design Procedures 1-10
1.3.3 Design/Check Calculation File 1-17
1.3.4 PS&E Review Period 1-19
1.3.5 Addenda 1-19
1.3.6 Shop Plans and Permanent Structure Construction Procedures 1-19
1.3.7 Contract Plan Changes (Change Orders and As-Builts) 1-22
1.3.8 Archiving Design Calculations, Design Files, and S&E Files 1-24
1.3.9 Public Disclosure Policy Regarding Bridge Plans 1-26
1.3.10 Use of Computer Software 1-27

1.4 Quality Control/Quality Assurance/Quality Verification (QC/QA/QV) Procedures 1-28
1.4.1 General 1-28
1.4.2 WSDOT Prepared Bridge (or Structure) Preliminary Plans 1-28
1.4.3 WSDOT Prepared PS&E 1-29
1.4.4 Consultant Prepared PS&E/Preliminary Plans on WSDOT Right of Way 1-34
1.4.5 Structural Design Work Prepared Under Design-Build or GCCM Methods of Project Delivery 1-35

1.5 Bridge Design Scheduling 1-36
1.5.1 General 1-36
1.5.2 Preliminary Design Schedule 1-36
1.5.3 Final Design Schedule 1-36

1.6 Guidelines for Bridge Site Visits 1-39
1.6.1 Bridge Rehabilitation Projects 1-39
1.6.2 Bridge Widening and Seismic Retrofits 1-39
1.6.3 Rail and Minor Expansion Joint Retrofits 1-39
1.6.4 New Bridges 1-40
1.6.5 Bridge Demolition 1-40
1.6.6 Proximity of Railroads Adjacent to the Bridge Site 1-40

1.7 Appendices 1-41
Appendix 1.1-A1 Bridge Design Manual Revision QC/QA Worksheet 1-42
Appendix 1.3-A1 Bridge & Structures Design Calculations 1-43
Appendix 1.4-A1 QC/QA Signature Sheet 1-44

1.99 References 1-46

Chapter 2 Preliminary Design 2-1

2.1 Preliminary Studies 2-1

2.2 Preliminary Plan 2-7
2.2.1 Development of the Preliminary Plan 2-7
2.2.2 Documentation 2-9
2.2.3 General Factors for Consideration 2-10
2.2.4 Permits 2-12
2.2.5 Preliminary Cost Estimate 2-13
2.2.6 Approvals 2-13

2.3 Preliminary Plan Criteria 2-17
2.3.1 Highway Crossings 2-17
2.3.2 Railroad Crossings 2-21
2.3.3 Water Crossings 2-23
2.3.4 Bridge Widening 2-25
2.3.5 Detour Structures 2-26
2.3.6 Retaining Walls and Noise Walls 2-26
2.3.7 Bridge Deck Drainage 2-26
2.3.8 Bridge Deck Protection Systems 2-27
2.3.9 Construction Clearances 2-27
2.3.10 Design Guides for Falsework Depth Requirements 2-27
2.3.11 Inspection and Maintenance Access 2-29

2.4 Selection of Structure Type 2-31

2.5 Aesthetic Considerations 2-39

2.6 Miscellaneous 2-42

2.7 WSDOT Standards for Highway Bridges 2-43
2.7.1 Design Elements 2-43
2.7.2 Detailing the Preliminary Plan 2-45

2.8 Bridge Security 2-46
2.8.1 General 2-46
2.8.2 Design 2-46
2.8.3 Design Criteria 2-47

2.9 Bridge Standard Drawings 2-49

2.10 Appendices 2-50
Appendix 2.2-A1 Bridge Site Data General 2-51
Appendix 2.2-A2 Bridge Site Data Rehabilitation 2-52
Appendix 2.2-A3 Bridge Site Data Stream Crossing 2-53
Appendix 2.2-A4 Preliminary Plan Checklist 2-54
Appendix 2.2-A5 Request For Preliminary Geotechnical Information 2-56
Appendix 2.3-A1 Bridge Stage Construction Comparison 2-58

2.99 References 2-60

Chapter 3 Loads 3-1

3.1 Scope 3-1

3.2 Definitions 3-2

3.3 Load Designations 3-3

3.4 Limit States 3-4

3.5 Load Factors and Load Combinations 3-5
3.5.1 Load Factors for Substructure 3-6

3.6 Loads and Load Factors for Construction 3-7

3.7 Load Factors for Post-tensioning 3-8
3.7.1 Post-tensioning Effects from Superstructure 3-8
3.7.2 Secondary Forces from Post-tensioning, PS 3-8

3.8 Permanent Loads 3-9
3.8.1 Deck Overlay Requirement 3-9

3.9 Live Loads 3-11
3.9.1 Design Live Load 3-11
3.9.2 Loading for Live Load Deflection Evaluation 3-11
3.9.3 Distribution to Superstructure 3-11
3.9.4 Bridge Load Rating 3-13

3.10 Pedestrian Loads 3-14

3.11 Wind Loads 3-15
3.11.1 Wind Load to Superstructure 3-15
3.11.2 Wind Load to Substructure 3-15
3.11.3 Wind on Noise Walls 3-15

3.12 Loads on Culverts 3-16

3.13 Earthquake Effects 3-17

3.14 Earth Pressure 3-18

3.15 Force Effects Due to Superimposed Deformations 3-19

3.16 Other Loads 3-20
3.16.1 Buoyancy 3-20
3.16.2 Collision Force on Bridge Substructure 3-20
3.16.3 Collision Force on Traffic Barrier 3-20
3.16.4 Force from Stream Current, Floating Ice, and Drift 3-20
3.16.5 Ice Load 3-20
3.16.6 Uniform Temperature Load 3-20

3.99 References 3-21

Chapter 4 Seismic Design and Retrofit 4-1

4.1 General 4-1

4.2 WSDOT Additions and Modifications to AASHTO Guide Specifications for LRFD Seismic Bridge Design 4-2
4.2.1 Definitions 4-2
4.2.2 Earthquake Resisting Systems (ERS) Requirements for Seismic Design Catagories (SDCs) C and D 4-2
4.2.3 Seismic Ground Shaking Hazard 4-7
4.2.4 Selection of Seismic Design Category (SDC) 4-7
4.2.5 Temporary and Staged Construction 4-7
4.2.6 Load and Resistance Factors 4-8
4.2.7 Balanced Stiffness Requirements and Balanced Frame Geometry Recommendation . 4-8
4.2.8 Selection of Analysis Procedure to Determine Seismic Demand 4-8
4.2.9 Member Ductility Requirement for SDCs C and D 4-8
4.2.10 Longitudinal Restrainers 4-8
4.2.11 Abutments 4-9
4.2.12 Foundation – General 4-13
4.2.13 Foundation – Spread Footing 4-13
4.2.14 Procedure 3: Nonlinear Time History Method 4-14
4.2.15 I_{eff} for Box Girder Superstructure 4-14
4.2.16 Foundation Rocking 4-14
4.2.17 Drilled Shafts 4-14
4.2.18 Longitudinal Direction Requirements 4-14
4.2.19 Liquefaction Design Requirements 4-14
4.2.20 Reinforcing Steel 4-14
4.2.21 Concrete Modeling 4-15
4.2.22 Expected Nominal Moment Capacity 4-15
4.2.23 Interlocking Bar Size 4-15
4.2.24 Splicing of Longitudinal Reinforcement in Columns Subject to Ductility Demands for SDCs C and D 4-15
4.2.25 Development Length for Column Bars Extended into Oversized Pile Shafts f or SDCs C and D 4-16
4.2.26 Lateral Confinement for Oversized Pile Shaft for SDCs C and D 4-16
4.2.27 Lateral Confinement for Non-Oversized Strengthened Pile Shaft for SDCs C and D 4-16
4.2.28 Requirements for Capacity Protected Members 4-16
4.2.29 Superstructure Capacity Design for Transverse Direction (Integral Bent Cap) for SDCs C and D 4-17
4.2.30 Superstructure Design for Non Integral Bent Caps for SDCs B, C, and D 4-17
4.2.31 Joint Proportioning 4-17
4.2.32 Cast-in-Place and Precast Concrete Piles 4-17

4.3 Seismic Design Requirements for Bridge Modifications and Widening Projects 4-18
4.3.1 General 4-18
4.3.2 Bridge Widening Project Classification 4-18
4.3.3 Seismic Design Guidance: 4-19
4.3.4 Scoping for Bridge Widening and Liquefaction Mitigation 4-22
4.3.5 Design and Detailing Considerations 4-22

4.4 Seismic Retrofitting of Existing Bridges 4-24
4.4.1 Seismic Analysis Requirements 4-24
4.4.2 Seismic Retrofit Design 4-24
4.4.3 Computer Analysis Verification 4-25
4.4.4 Earthquake Restrainers 4-25
4.4.5 Isolation Bearings 4-25

4.5 Seismic Design Requirements for Retaining Walls 4-26
4.5.1 General 4-26

4.6 Appendices 4-27
Appendix 4-B1 Design Examples of Seismic Retrofits 4-28
Appendix 4-B2 SAP2000 Seismic Analysis Example 4-33

4.99 References 4-117

Chapter 5 Concrete Structures 5-1

5.0 General 5-1

5.1 Materials 5-2
5.1.1 Concrete 5-2
5.1.2 Reinforcing Steel 5-8
5.1.3 Prestressing Steel 5-12
5.1.4 Prestress Losses 5-19
5.1.5 Prestressing Anchorage Systems 5-23
5.1.6 Post-Tensioning Ducts 5-23

5.2 Design Considerations 5-25
5.2.1 Service and Fatigue Limit States 5-25
5.2.2 Strength-Limit State 5-26
5.2.3 Strut-and-Tie Model 5-30
5.2.4 Deflection and Camber 5-30
5.2.5 Construction Joints 5-33
5.2.6 Inspection Lighting and Access 5-33

5.3 Reinforced Concrete Box Girder Bridges 5-37
5.3.1 Box Girder Basic Geometries 5-37
5.3.2 Reinforcement 5-42
5.3.3 Crossbeam 5-50
5.3.4 End Diaphragm 5-53
5.3.5 Dead Load Deflection and Camber 5-56
5.3.6 Thermal Effects 5-56
5.3.7 Hinges 5-57
5.3.8 Drain Holes 5-57

5.4 Hinges and Inverted T-Beam Pier Caps 5-59

5.5 Bridge Widenings 5-62
5.5.1 Review of Existing Structures 5-62
5.5.2 Analysis and Design Criteria 5-63
5.5.3 Removing Portions of the Existing Structure 5-67
5.5.4 Attachment of Widening to Existing Structure 5-67
5.5.5 Expansion Joints 5-80
5.5.6 Possible Future Widening for Current Designs 5-81
5.5.7 Bridge Widening Falsework 5-81
5.5.8 Existing Bridge Widenings 5-81

5.6 Prestressed Concrete Girder Superstructures 5-82
5.6.1 WSDOT Standard Prestressed Concrete Girder Types 5-82
5.6.2 Design Criteria 5-85
5.6.3 Fabrication and Handling 5-95
5.6.4 Superstructure Optimization 5-100
5.6.5 Repair of Damaged Prestressed Concrete Girders at Fabrication 5-106
5.6.6 Repair of Damaged Prestressed Concrete Girders in Existing Bridges 5-106
5.6.7 Deck Girders 5-111
5.6.8 Prestressed Concrete Tub Girders 5-114
5.6.9 Prestressed Concrete Girder Checking Requirement 5-115
5.6.10 Review of Shop Plans for Pre-tensioned Girders 5-115

5.7 Bridge Decks 5-116
5.7.1 Bridge Deck Requirements 5-116
5.7.2 Bridge Deck Reinforcement 5-117
5.7.3 Stay-in-place Deck Panels 5-122
5.7.4 Bridge Deck Protection 5-123
5.7.5 Bridge Deck HMA Paving Design Policies 5-130

5.8 Cast-in-place Post-Tensioned Bridges 5-134
5.8.1 Design Parameters 5-134
5.8.2 Analysis 5-143
5.8.3 Post-tensioning 5-146
5.8.4 Shear and Anchorages 5-151
5.8.5 Temperature Effects 5-152
5.8.6 Construction 5-153
5.8.7 Post-tensioning Notes — Cast-in-place Girders 5-156

5.9 Spliced Prestressed Concrete Girders 5-157
5.9.1 Definitions 5-157
5.9.2 WSDOT Criteria for Use of Spliced Girders 5-158
5.9.3 Girder Segment Design 5-158
5.9.4 Joints Between Segments 5-159
5.9.5 Review of Shop Plans for Spliced Prestressed Concrete Girders 5-164
5.9.6 Post-tensioning Notes — Spliced Prestressed Concrete Girders 5-165

5.10 Bridge Standard Drawings 5-167

5.11 Appendices 5-171
Appendix 5.1-A1 Standard Hooks 5-173
Appendix 5.1-A2 Minimum Reinforcement Clearance and Spacing for Beams and Columns 5-174
Appendix 5.1-A3 Reinforcing Bar Properties 5-175
Appendix 5.1-A4 Tension Development Length of Deformed Bars 5-176
Appendix 5.1-A5 Compression Development Length and Minimum Lap Splice of Grade 60 Bars 5-179
Appendix 5.1-A6 Tension Development Length of 90º and 180º Standard Hooks 5-180
Appendix 5.1-A7 Tension Lap Splice Lengths of Grade 60 Bars – Class B 5-182
Appendix 5.1-A8 Prestressing Strand Properties and Development Length 5-185
Appendix 5.2-A1 Working Stress Design 5-186
Appendix 5.2-A2 Working Stress Design 5-187
Appendix 5.2-A3 Working Stress Design 5-188
Appendix 5.3-A1 Positive Moment Reinforcement 5-189
Appendix 5.3-A2 Negative Moment Reinforcement 5-190
Appendix 5.3-A3 Adjusted Negative Moment Case I (Design for M at Face of Support) . . 5-191
Appendix 5.3-A4 Adjusted Negative Moment Case II (Design for M at ¼ Point) 5-192
Appendix 5.3-A5 Cast-In-Place Deck Slab Design for Positive Moment Regions $f'_c = 4.0$ ksi 5-193
Appendix 5.3-A6 Cast-In-Place Deck Slab Design for Negative Moment Regions $f'_c = 4.0$ ksi 5-194
Appendix 5.3-A7 Slab Overhang Design-Interior Barrier Segment 5-195
Appendix 5.3-A8 Slab Overhang Design-End Barrier Segment 5-196
Appendix 5.6-A1-1 Span Capability of W Girders 5-197
Appendix 5.6-A1-2 Span Capability of WF Girders 5-198
Appendix 5.6-A1-3 Span Capability of Deck Bulb Tee Girders 5-200
Appendix 5.6-A1-4 Span Capability of WF Thin Deck Girders 5-201
Appendix 5.6-A1-5 Span Capability of WF Deck Girders 5-203
Appendix 5.6-A1-6 Span Capability of Trapezoidal Tub Girders without Top Flange 5-205
Appendix 5.6-A1-7 Span Capability of Trapezoidal Tub Girders with Top Flange 5-206
Appendix 5.6-A1-8 Span Capability of Post-tensioned Spliced I-Girders 5-207
Appendix 5.6-A1-9 Span Capability of Post-tensioned Spliced Tub Girders 5-209
Appendix 5-B1 "A" Dimension for Precast Girder Bridges 5-211
Appendix 5-B2 Vacant 5-222
Appendix 5-B3 Existing Bridge Widenings 5-223
Appendix 5-B4 Post-tensioned Box Girder Bridges 5-225
Appendix 5-B5 Simple Span Prestressed Girder Design 5-231
Appendix 5-B6 Cast-in-Place Slab Design Example 5-317
Appendix 5-B7 Precast Concrete Stay-in-place (SIP) Deck Panel 5-335
Appendix 5-B8 W35DG Deck Bulb Tee 48" Wide 5-353
Appendix 5-B9 Prestressed Voided Slab with Cast-in-Place Topping 5-365
Appendix 5-B10 Positive EQ Reinforcement at Interior Pier of a Prestressed Girder 5-393
Appendix 5-B11 LRFD Wingwall Design Vehicle Collision 5-398
Appendix 5-B12 Flexural Strength Calculations for Composite T-Beams 5-401
Appendix 5-B13 Strut-and-Tie Model Design Example for Hammerhead Pier 5-407
Appendix 5-B14 Shear and Torsion Capacity of a Reinforced Concrete Beam 5-417
Appendix 5-B15 Sound Wall Design – Type D-2k 5-423

Chapter 6 Structural Steel 6-1

6.0 Structural Steel 6-1
6.0.1 Introduction 6-1
6.0.2 Special Requirements for Steel Bridge Rehabilitation or Modification 6-1

6.1 Design Considerations 6-2
6.1.1 Codes, Specification, and Standards 6-2
6.1.2 WSDOT Steel Bridge Practice 6-3
6.1.3 Preliminary Girder Proportioning 6-4
6.1.4 Estimating Structural Steel Weights 6-4
6.1.5 Bridge Steels 6-6
6.1.6 Plate Sizes 6-7
6.1.7 Girder Segment Sizes 6-7
6.1.8 Computer Programs 6-8
6.1.9 Fasteners 6-8

6.2 Girder Bridges 6-10

6.3 Design of I-Girders 6-14
6.3.1 Limit States for AASHTO LRFD 6-14
6.3.2 Composite Section 6-14
6.3.3 Flanges 6-15
6.3.4 Webs 6-15
6.3.5 Transverse Stiffeners 6-15
6.3.6 Longitudinal Stiffeners 6-16
6.3.7 Bearing Stiffeners 6-16
6.3.8 Cross Frames 6-16
6.3.9 Bottom Laterals 6-18
6.3.10 Bolted Field Splice for Girders 6-18
6.3.11 Camber 6-19
6.3.12 Bridge Deck Placement Sequence 6-21
6.3.13 Bridge Bearings for Steel Girders 6-22
6.3.14 Surface Roughness and Hardness 6-22
6.3.15 Welding 6-24
6.3.16 Shop Assembly 6-25

6.4 Plan Details 6-27
6.4.1 General 6-27
6.4.2 Structural Steel Notes 6-27
6.4.3 Framing Plan 6-27
6.4.4 Girder Elevation 6-27
6.4.5 Typical Girder Details 6-28
6.4.6 Cross Frame Details 6-28
6.4.7 Camber Diagram and Bearing Stiffener Rotation 6-29
6.4.8 Bridge Deck 6-29
6.4.9 Handrail Details, Inspection Lighting, and Access 6-30
6.4.10 Box Girder Details 6-30

6.5 Shop Plan Review 6-32

6.6 Bridge Standard Drawings 6-33
Structural Steel 6-33

6.99 References 6-34

Chapter 7 Substructure Design 7-1

7.1 General Substructure Considerations 7-1
7.1.1 Foundation Design Process 7-1
7.1.2 Foundation Design Limit States 7-3
7.1.3 Seismic Design. 7-3
7.1.4 Substructure and Foundation Loads 7-3
7.1.5 Concrete Class for Substructure 7-5
7.1.6 Foundation Seals 7-6

7.2 Foundation Modeling for Seismic Loads 7-9
7.2.1 General 7-9
7.2.2 Substructure Elastic Dynamic Analysis Procedure 7-9
7.2.3 Bridge Model Section Properties 7-10
7.2.4 Bridge Model Verification 7-11
7.2.5 Deep Foundation Modeling Methods 7-12
7.2.6 Lateral Analysis of Piles and Shafts 7-17
7.2.7 Spread Footing Modeling 7-23

7.3 Column Design 7-26
7.3.1 General Design Considerations 7-26
7.3.2 Slenderness Effects. 7-27
7.3.3 Shear Design 7-29
7.3.4 Column Silos 7-29
7.3.5 Column Reinforcement 7-32
7.3.6 Column Hinges 7-44
7.3.7 Reduced Column Section 7-46

7.4 Crossbeams 7-50
7.4.1 General Design 7-50

7.5 Abutment Design and Details 7-54
7.5.1 General 7-54
7.5.2 Embankment at Abutments 7-57
7.5.3 Abutment Loading 7-58
7.5.4 Temporary Construction Load Cases 7-60
7.5.5 Abutment Bearings and Girder Stops 7-60
7.5.6 Abutment Expansion Joints 7-62
7.5.7 Open Joint Details 7-62
7.5.8 Construction Joints 7-63
7.5.9 Abutment Wall Design 7-63
7.5.10 Drainage and Backfilling. 7-66
7.5.11 Abutments Supported By Mechanically-Stabilized Earth Walls. 7-68

7.6 Abutment Wing Walls and Curtain Walls 7-72
7.6.1 Traffic Barrier Loads. 7-72
7.6.2 Wing Wall Design. 7-72
7.6.3 Wing Wall Detailing 7-72

7.7 Footing Design 7-73
7.7.1 General Footing Criteria 7-73
7.7.2 Loads and Load Factors 7-74
7.7.3 Geotechnical Report Summary 7-75
7.7.4 Spread Footing Design 7-76
7.7.5 Pile-Supported Footing Design 7-83

7.8 Shafts . . . 7-85
7.8.1 Axial Resistance . . . 7-85
7.8.2 Structural Design and Detailing . . . 7-90

7.9 Piles and Piling . . . 7-98
7.9.1 Pile Types . . . 7-98
7.9.2 Single Pile Axial Resistance . . . 7-100
7.9.3 Block Failure . . . 7-100
7.9.4 Pile Uplift . . . 7-100
7.9.5 Pile Spacing . . . 7-100
7.9.6 Structural Design and Detailing of CIP Concrete Piles . . . 7-101
7.9.7 Pile Splices . . . 7-102
7.9.8 Pile Lateral Design . . . 7-102
7.9.9 Battered Piles . . . 7-102
7.9.10 Pile Tip Elevations and Quantities . . . 7-103
7.9.11 Plan Pile Resistance . . . 7-103

7.10 Concrete-Filled Tubes . . . 7-104
7.10.1 Scope . . . 7-104
7.10.2 Design Requirements . . . 7-104
7.10.3 CFT-to-Cap Connections . . . 7-109
7.10.4 RCFT-to-Column Connections . . . 7-114
7.10.5 Partially-filled CFT . . . 7-115
7.10.6 Construction Requirements . . . 7-116
7.10.7 Notation . . . 7-116

7.11 Bridge Standard Drawings . . . 7-119

7.12 Appendices . . . 7-120
Appendix 7.3-A2 Noncontact Lap Splice Length Column to Shaft Connections . . . 7-121
Appendix 7-B1 Linear Spring Calculation Method II (Technique I) . . . 7-123
Appendix 7-B2 Pile Footing Matrix Example Method II (Technique I) . . . 7-128
Appendix 7-B3 Non-Linear Springs Method III . . . 7-132

7.99 References . . . 7-134

Chapter 8 Walls and Buried Structures . . . 8-1

8.1 Retaining Walls . . . 8-1
8.1.1 General . . . 8-1
8.1.2 Common Types of Retaining Walls . . . 8-2
8.1.3 General Design Considerations . . . 8-4
8.1.4 Design of Reinforced Concrete Cantilever Retaining Walls . . . 8-4
8.1.5 Design of Cantilever Soldier Pile and Soldier Pile Tieback Walls . . . 8-10
8.1.6 Design of Structural Earth Walls . . . 8-13
8.1.7 Design of Standard Plan Geosynthetic Walls . . . 8-14
8.1.8 Design of Soil Nail Walls . . . 8-14
8.1.9 Miscellaneous Items . . . 8-14

8.2 Noise Barrier Walls . . . 8-18
8.2.1 General . . . 8-18
8.2.2 Loads . . . 8-18
8.2.3 Design . . . 8-19

8.3 Buried Structures 8-22
8.3.1 General 8-22
8.3.2 WSDOT Designed Standard Culverts 8-22
8.3.3 General Design Requirements 8-22
8.3.4 Design of Box Culverts 8-25
8.3.5 Design of Precast Reinforced Concrete Three-Sided Structures 8-26
8.3.6 Design of Detention Vaults 8-27
8.3.7 Design of Metal Pipe Arches 8-29
8.3.8 Design of Tunnels 8-29

8.4 Bridge Standard Drawings 8-31

8.5 Appendices 8-32
Appendix 8.1-A1 Summary of Design Specification Requirements for Walls 8-33
Appendix 8.3-A1 Precast Split Box Culvert Design Criteria 8-35
Appendix 8.3-A2 3-Sided Precast Culvert Design Criteria 8-36
Appendix 8.3-A3 Design Example of Racking Analysis of Precast Split Box Culvert 8-37

8.99 References 8-38

Chapter 9 Bearings and Expansion Joints 9-1

9.1 Expansion Joints 9-1
9.1.1 General Considerations 9-1
9.1.2 General Design Criteria 9-3
9.1.3 Small Movement Range Joints 9-4
9.1.4 Medium Movement Range Joints 9-11
9.1.5 Large Movement Range Joints 9-15

9.2 Bearings 9-22
9.2.1 General Considerations 9-22
9.2.2 Force Considerations 9-22
9.2.3 Movement Considerations 9-23
9.2.4 Detailing Considerations 9-23
9.2.5 Bearing Types 9-24
9.2.6 Miscellaneous Details 9-30
9.2.7 Contract Drawing Representation 9-31
9.2.8 Shop Drawing Review 9-31
9.2.9 Bearing Replacement Considerations 9-32

9.3 Seismic Isolation Bearings 9-33
9.3.1 General Considerations 9-33
9.3.2 General Design Criteria 9-34
9.3.3 Seismic Isolation Bearing Submittal Requirements 9-34
9.3.4 Seismic Isolation Bearing Review Process 9-35
9.3.5 Seismic Isolation Bearing Inspection 9-37

9.4 Bridge Standard Drawings 9-38
Expansion Joints 9-38

Chapter 10 Signs, Barriers, Approach Slabs, and Utilities 10-1

10.1 Sign and Luminaire Supports 10-1
10.1.1 Loads 10-1
10.1.2 Bridge Mounted Signs 10-4
10.1.3 Monotube Sign Structures Mounted on Bridges 10-8
10.1.4 Monotube Sign Structures 10-9
10.1.5 Foundations 10-13
10.1.6 Truss Sign Bridges: Foundation Sheet Design Guidelines 10-16

10.2 Bridge Traffic Barriers 10-17
10.2.1 General Guidelines 10-17
10.2.2 Bridge Railing Test Levels 10-18
10.2.3 Available WSDOT Designs 10-18
10.2.4 Design Criteria 10-22

10.3 At Grade Concrete Barriers 10-28
10.3.1 Differential Grade Concrete Barriers 10-28
10.3.2 Traffic Barrier Moment Slab 10-29
10.3.3 Precast Concrete Barrier 10-33

10.4 Bridge Traffic Barrier Rehabilitation 10-34
10.4.1 Policy 10-34
10.4.2 Guidelines 10-34
10.4.3 Design Criteria 10-34
10.4.4 WSDOT Bridge Inventory of Bridge Rails 10-35
10.4.5 Available Retrofit Designs 10-35
10.4.6 Available Replacement Designs 10-36

10.5 Bridge Railing 10-37
10.5.1 Design 10-37
10.5.2 Railing Types 10-37

10.6 Bridge Approach Slabs 10-38
10.6.1 Notes to Region for Preliminary Plan 10-38
10.6.2 Bridge Approach Slab Design Criteria 10-39
10.6.3 Bridge Approach Slab Detailing 10-39
10.6.4 Skewed Bridge Approach Slabs 10-40
10.6.5 Approach Anchors and Expansion Joints 10-41
10.6.6 Bridge Approach Slab Addition or Retrofit to Existing Bridges 10-42
10.6.7 Bridge Approach Slab Staging 10-44

10.7 Traffic Barrier on Bridge Approach Slabs 10-45
10.7.1 Bridge Approach Slab over Wing Walls, Cantilever Walls or Geosynthetic Walls 10-45
10.7.2 Bridge Approach Slab over SE Walls 10-47

10.8 Utilities Installed with New Construction 10-48
10.8.1 General Concepts 10-48
10.8.2 Utility Design Criteria 10-51
10.8.3 Box/Tub Girder Bridges 10-53
10.8.4 Traffic Barrier Conduit 10-53
10.8.5 Conduit Types 10-54
10.8.6 Utility Supports 10-54

10.9 Utility Review Procedure for Installation on Existing Bridges 10-56
10.9.1 Utility Review Checklist 10-57

10.10 Drilled Anchors For Permanent Attachments 10-59

10.11 Drainage Design 10-60

10.12 Bridge Security Fence 10-61

10.13 Temporary Bridges 10-62
10.13.1 General 10-62
10.13.2 Design 10-62
10.13.3 NBI Requirements 10-64
10.13.4 Submittal Requirements 10-64
10.13.5 Bridge Security 10-65

10.14 References 10-67

10.15 Bridge Standard Drawings 10-68

Chapter 11 Detailing Practice 11-1

11.1 Detailing Practice 11-1
11.1.1 Standard Office Practices 11-1
11.1.2 Bridge Office Standard Drawings and Office Examples 11-8
11.1.3 Plan Sheets 11-9
11.1.4 Electronic Plan Sharing Policy 11-12
11.1.5 Structural Steel 11-12
11.1.6 Aluminum Section Designations 11-14
11.1.7 Abbreviations 11-15

11.2 Bridge Standard Drawings 11-23

11.3 Appendices 11-24
Appendix 11.1-A1 Dimensional Callout Example 11-25
Appendix 11.1-A2 Typical Details 11-26
Appendix 11.1-A3 Typical Section Callouts 11-27

Chapter 12 Quantities, Costs, and Specifications 12-1

12.1 Quantities - General 12-1
12.1.1 Cost Estimating Quantities 12-1
12.1.2 Not Included in Bridge Quantities List 12-2

12.2 Computation of Quantities 12-3
12.2.1 Responsibilities 12-3
12.2.2 Procedure for Computation 12-3
12.2.3 Data Source 12-4
12.2.4 Accuracy 12-4
12.2.5 Excavation 12-4
12.2.6 Shoring or Extra Excavation, Class A 12-7
12.2.7 Piling 12-10
12.2.8 Conduit Pipe 12-10
12.2.9 Private Utilities Attached To Bridge Structures 12-11
12.2.10 Drilled Shafts 12-11

12.3 Construction Costs 12-13
12.3.1 Introduction 12-13
12.3.2 Factors Affecting Costs 12-13
12.3.3 Development of Cost Estimates 12-14

12.4 Construction Specifications and Estimates 12-17
12.4.1 General 12-17
12.4.2 Definitions 12-17
12.4.3 General Bridge S&E Process 12-18
12.4.4 Reviewing Bridge Plans 12-19
12.4.5 Preparing the Bridge Cost Estimates 12-20
12.4.6 Preparing the Bridge Specifications 12-21
12.4.7 Preparing the Bridge Working Day Schedule 12-22
12.4.8 Reviewing Projects Prepared by Consultants 12-23
12.4.9 Submitting the PS&E Package 12-23
12.4.10 PS&E Review Period and Turn-in for AD Copy 12-24

12.5 Appendices
Appendix 12.1-A1 Not Included In Bridge Quantities List 12-28
Appendix 12.2-A1 Bridge Quantities 12-29
Appendix 12.3-A1 Structural Estimating Aids Construction Costs 12-35
Appendix 12.3-A2 Structural Estimating Aids Construction Costs 12-37
Appendix 12.3-A3 Structural Estimating Aids Construction Costs 12-39
Appendix 12.3-A4 Structural Estimating Aids Construction Costs 12-41
Appendix 12.3-B1 Cost Estimate Summary 12-42
Appendix 12.4-A1 Special Provisions Checklist 12-43
Appendix 12.4-A2 Structural Estimating Aids Construction Time Rates 12-48
Appendix 12.4-B1 Construction Working Day Schedule 12-50

Chapter 13 Bridge Load Rating 13-1

13.1 General 13-1
13.1.1 LRFR Method per the MBE 13-2
13.1.2 Load Factor Method (LFR) 13-4
13.1.3 Allowable Stress Method (ASD) 13-7
13.1.4 Live Loads 13-7
13.1.5 Rating Trucks 13-8

13.2 Special Rating Criteria 13-11
13.2.1 Dead Loads 13-11
13.2.2 Live Load Distribution Factors 13-11
13.2.3 Reinforced Concrete Structures 13-11
13.2.4 Prestressed Concrete Structures 13-11
13.2.5 Concrete Decks 13-11
13.2.6 Concrete Crossbeams 13-11
13.2.7 In-Span Hinges 13-12
13.2.8 Girder Structures 13-12
13.2.9 Box Girder Structures 13-12
13.2.10 Segmental Concrete Bridges 13-12
13.2.11 Concrete Slab Structures 13-12
13.2.12 Steel Structures 13-12
13.2.13 Steel Floor Systems 13-12
13.2.14 Steel Truss Structures 13-12
13.2.15 Timber Structures 13-13
13.2.16 Widened or Rehabilitated Structures 13-13
13.2.17 Culverts 13-13
13.2.18 Overloads 13-13

13.3 Load Rating Software 13-14

13.4 Load Rating Reports 13-15

13.5 Appendices 13-16
Appendix 13.4-A1 LFR Bridge Rating Summary 13-17
Appendix 13.4-A2 LRFR Bridge Rating Summary 13-18

13.99 References 13-20

Chapter 14 Accelerated and Innovative Bridge Construction 14-1

14.1 Introduction 14-1
14.1.1 General 14-1
14.1.2 ABC Methods 14-2

14.2 Application of ABC 14-3
14.2.1 Economics of ABC 14-3
14.2.2 Practical Applications 14-3
14.2.3 Prefabricated Bridge Elements and Systems 14-4
14.2.4 Prefabricated Systems 14-7
14.2.5 Project Delivery Methods 14-8
14.2.6 Decision Making Tools 14-8

14.3 Structural Systems 14-11
14.3.1 Precast Bent System Design for High Seismic Regions 14-11
14.3.2 Geosynthetic Reinforced Soil Integrated Bridge System 14-40
14.3.3 Precast Decks 14-41

14.4 Innovative Bridge Construction 14-44
14.4.1 Self-Centering Columns 14-44
14.4.2 Shape Memory Alloy 14-45

14.5 Shipping, Handling and Erection 14-48
14.5.1 Lifting Devices 14-48
14.5.2 Handling, Storage and Shipping 14-48
14.5.3 Tolerances 14-49
14.5.4 Assembly Plans 14-49
14.5.5 Element Sizes 14-50

14.6 Installation Method Options 14-51
14.6.1 Crane Sizing 14-51
14.6.2 Lateral Sliding 14-51
14.6.3 Self-Propelled Modular Transporters 14-52

14.7 Examples of Accelerated and Innovative Bridge Construction 14-54

14.99 References 14-56

Chapter 15 Structural Design Requirements for Design-Build Contracts 15-1

15.1 Manual Description 15-1
15.1.1 Purpose 15-1
15.1.2 Specifications 15-1

15.2 Bridge Configuration Criteria 15-2
15.2.1 General 15-2
15.2.2 Railroad Crossings 15-2
15.2.3 Detour Structures 15-3
15.2.4 Inspection and Maintenance Access 15-3
15.2.5 Bridge Types 15-4
15.2.6 Aesthetic Design Elements 15-4
15.2.7 Architectural Design Standards 15-5
15.2.8 Methods 15-5
15.2.9 Design-Builder Urban Design Team 15-5
15.2.10 Analysis and Design Criteria for Structural Widenings and Modifications 15-6
15.2.11 Bridge Security 15-7

15.3 Load Criteria 15-8
15.3.1 Scope 15-8
15.3.2 Load Factors and Load Combinations 15-8
15.3.3 Permanent Loads 15-8
15.3.4 Live Loads 15-9
15.3.5 Noise Barrier Walls 15-10

15.4 Seismic Design and Retrofit 15-11
15.4.1 General 15-11
15.4.2 WSDOT Additions and Modifications to AASHTO Guide Specifications for LRFD Seismic Bridge Design 15-11
15.4.3 Seismic Design Requirements for Bridge Modifications and Widening Projects 15-22
15.4.4 Seismic Retrofitting of Existing Bridges 15-23

15.5 Concrete Structures 15-25
15.5.1 General 15-25
15.5.2 Materials 15-25
15.5.3 Design Considerations 15-27
15.5.4 Superstructures 15-28
15.5.5 Concrete Bridge Decks 15-32

15.6 Steel Structures 15-34
15.6.1 Design Considerations 15-34
15.6.2 Girder Bridges 15-36
15.6.3 Design of I-Girders 15-37
15.6.4 Plan Details 15-42

15.7 Substructure Design 15-46
15.7.1 General Substructure Considerations 15-46
15.7.2 Foundation Modeling for Seismic Loads 15-46
15.7.3 Column Design 15-48
15.7.4 Column Reinforcement 15-50
15.7.5 Abutment Design and Details 15-50
15.7.6 Footing Design 15-52
15.7.7 Drilled Shafts 15-54
15.7.8 Piles and Piling 15-55
15.7.9 Concrete-Filled Tubes 15-56

15.8 Walls and Buried Structures 15-57
15.8.1 Retaining Walls 15-57
15.8.2 Noise Barrier Walls. 15-60
15.8.3 Buried Structures 15-61

15.9 Bearings and Expansion Joints 15-63
15.9.1 Expansion Joints. 15-63
15.9.2 Bearings 15-68

15.10 Signs, Barriers, Bridge Approach Slabs, and Utilities 15-74
15.10.1 Sign and Luminaire Supports. 15-74
15.10.2 Bridge Traffic Barriers 15-81
15.10.3 At Grade Concrete Barriers 15-83
15.10.4 Bridge Traffic Barrier Rehabilitation 15-85
15.10.5 Bridge Railing 15-86
15.10.6 Bridge Approach Slabs 15-86
15.10.7 Traffic Barrier on Bridge Approach Slabs 15-88
15.10.8 Utilities Installed with New Construction 15-88
15.10.9 Utility Installation on Existing Bridges 15-91
15.10.10 Resin Bonded Anchors 15-91
15.10.11 Drainage Design. 15-91

15.11 Detailing Practices 15-92
15.11.1 Standard Practices 15-92
15.11.2 Bridge Office Standard Drawings and Office Examples 15-96
15.11.3 Plan Sheets 15-96
15.11.5 Structural Steel. 15-98
15.11.6 Aluminum Section Designations 15-100
15.11.7 Abbreviations. 15-100

15.12 Bridge Load Rating. 15-101
15.12.1 General 15-101
15.12.2 Special Rating Criteria 15-103
15.12.3 Load Rating Software 15-106
15.12.4 Load Rating Reports 15-107

15.99 References 15-108
