State Highway Log

Planning Report
2002

SR 2 to SR 971

Washington State Department of Transportation
Planning and Programming Service Center

I N T R O D U C T I O N

The Washington State Department of Transportation is responsible for the administration of over 7000 miles of State Highways. This involves large expenditures for planning, design, construction, and maintenance which necessitate having reliable geometric data for the entire State Highway System.

The Roadway Data Section of Planning and Capital Program Management provides roadway geometrics in several reports. These include the STATE HIGHWAY LOG, the Road Life Report, the Horizontal and Vertical Alignment Report, and the Classification Log. Portions of these and other reports can be accessed on remote terminals through the TRIPS (TRansportation Information and Planning Support) system.

The STATE HIGHWAY LOG, which is published annually from TRIPS, contains roadway data and mileage statistics for all State Highways. This information is representative of data collected through the previous year. It is designed to provide a record of current highway system information and a source for computing distances between major points. Detailed explanations of all fields are included starting on page "I-1", titled "State Highway Log Reference." **The following three pages contain charts with data representative of lane miles added by construction and striping in 2001**.

The Roadway Geometrics Section is responsible for updating and maintaining the roadway portion of the TRIPS system. The information TRIPS contains is provided by numerous WSDOT Regional, Headquarters and other sources. If you can provide us with updated information, find an error in the STATE HIGHWAY LOG or TRIPS, or have any questions regarding roadway data, please contact the Transportation Data Office at (360) 570-2361 or fax (360) 570-2400. We are continuously looking for sources to provide us with quality information.

Roadway data not available in this log may be found using the TRIPS system. Those using TRIPS for data retrieval are encouraged to follow the "TRIPS User's Guide." Anyone having questions relating to the TRIPS system or to schedule TRIPS training, contact TRIPS Maintenance and Coordination, (360) 570-2406 or fax (360) 570-2400.

	FUNCTIONAL CLASS, LEVEL OF DEVELOPMENT, RURAL - URBAN
	MAINTENANCE AREA, SECTION, SURFACE TYPE

STATE HIGHWAY LOG REFERENCE

Each State Route will be uniquely identified through the use of a related roadway type and qualifier. Related roadway types (RRT) are as follows: (Asterisk indicates RRT included in this publication)

*Mainline	*Spur	*Couplet
*Alternate Route	*Reversible Lane	*HOV (Grade Sep)
Collector-Distributor	Ramps	Proposed Route
Temporary Route	Transitional Turnback	Under Construction
Frontage Road	Ferry Ship (boat)	Ferry Terminal

Related roadway qualifiers (RRQ) describe related roadway types for a State Route. For example, Colfax (Spur), Kelso (Couplet). For further information consult a TRIPS User Guide.

An example of a related roadway type and qualifier is shown on the SR 105 Spur in Westport:

STATE ROUTE =105
RELATED ROADWAY TYPE = SPUR
RELATED ROADWAY QUALIFIER = WESTPT

State Route Milepost (SRMP) identifies reference points and should not be used for computing distance. Accumulated Route Mileage (ARM) represents the actual miles of a section of roadway or route.

SRMP — State Route Milepost - sequential number, in designated direction of travel, of 1/100 mile increments along a State Route.

B — Indicates whether the milepost value is the 'back' duplicate of a milepost value 'ahead' on the route. Ahead values have an implied 'A' (blank).

ARM — The route mile accumulated from the beginning of a State Route in the direction of the roadway.

FEATURE — Following is a list of how some of the features are entered in the "feature" column:

Beg Bridge	Beg Eq	On Ramp
End Bridge	Uxing	Off Ramp
Enter Co	Intersectn	RR Xing
Beg Street	Misc Featr	Border Sta
End Street	Beg Ctlsec	Weigh Sta
Beg Tunnel	Flyer Stop	Leave City
End Tunnel	Prk & Ride	Toll Booth
Enter Dist	Rest Area	Ferry Term

DIRECTION TO INVENTORY

I = Increasing (mileposting increases when traveling the roadway in the increasing direction).

D = Decreasing (mileposting decreases when traveling the roadway in the decreasing direction).

B = Both directions of the roadway.

LEFT/RIGHT INDICATOR

Indicators show location of feature in relation to increasing direction of roadway.

L = Left (represents features located outside of the decreasing traveled way).
LC = Left Center (represents features located on the median side of the decreasing traveled way).
RC = Right Center (represents features located on the median side of the increasing traveled way).
R = Right (represents features located on the outside of the increasing traveled way).

Description - Description of Feature.

Bridge/UXing/XRoad - OW (Owner Code)

ST = State	CO = County	CT = City
FS = Forest Service	PK = Park Service	RS = Reservation
PV = Private	MY = Military	OT = Other
SO = State/County	SI = State/City	CC = County/City

Bridge/UXing/XRoad - TC (Traffic Control)

SS = Stop Sign	YS = Yield Sign
AF = Amber Flashing	RS = Railroad Signal
OT = Other Traffic Control	NO = No Traffic Control
SZ = School Zone	PC = Pedestrian Control
SG = Stop and Go	FS = Fire Signal
RF = Red Flashing	OF = Officer or Flagman

Bridge/UXing/XRoad - L (Illumination) Y = Yes
N = No

WIDTH AND SURFACE INFORMATION

Decreas/Div (Decreasing/Divided)

NBR LNS D = Number of lanes in decreasing direction of the roadway.

I = Number of lanes in increasing direction of the roadway.

LFT SHD W = Width of outside shoulder in decreasing direction of the roadway. No width will be shown when surface type = C or W.

S = Shoulder Surface Type

A = Asphalt	B = Bituminous	G = Gravel
S = Soil	C = Curb	W = Wall
P = Portland Cement Concrete		O = Other

RDY W = Width of roadway in decreasing direction of the roadway.

S = Roadway Surface Type

A = Asphalt	P = Portland Cement Concrete
B = Bituminous	G = Gravel
S = Soil	O = Other

RHT SHD W = Width of inside shoulder in decreasing direction of the roadway. No width will be entered when surface type = C or W.

S = Shoulder Surface Type (same as left shoulder surface types).

MEDIAN

WD Median Width

S Median Surface Type

S = Soil	G = Gravel
O = Other	A = Asphalt
B = Bituminous	P = Portland Cement Concrete

BR Median Barrier Type

DE = Depressed	CU = Curb
FB = Flex Beam	JE = Jersey Type Barrier
GP = Guide Post	RG = Rock Wall * Gabion
UP = Unprotected	IA = Impact Attenuator
WA = Wall	FE = Fence
SS = Snow Shed	BE = Bridge End Guard Rails
GR = Guard Rail	CA = Cable

INCRES/UNDI (INCREASING/UNDIVIDED)

Will be used for divided multilane in the direction of inventory, and for the entire roadway for two lane or undivided highways.

LFT SHD W = Width of inside shoulder in increasing direction of the roadway.

S = Shoulder Surface Type

RDY W = Width of roadway in increasing direction of the roadway.

S = Roadway Surface Type

RHT SHD W = Width of outside shoulder in increasing direction of the roadway.

S = Shoulder Surface Type

SPC USE LNS WID - Width of Special Use Lane

Special Use Lane Types - (Appears in Description Field)

Auxiliary	Two Way Turn	High Occupancy Vehicle
Bicycle	Reversible	Slow Vehicle Turnout
Chain Up	Transit	Truck Climbing Shoulder
Holding	Climbing	

TOT RDY WIDTH - Total roadway width includes decreasing roadway, increasing roadway and special use lane widths. This total does not include shoulder and median widths.

CLASSIFICATIONS

MTCE — Maintenance

A = Maintenance Area Number
SE = Maintenance Section Number

CITY NBR — City Number assigned to a city by the Census.

STFC — State Functional Classification

R1 = Rural-Principal Arterial	U1 = Urban-Principal Arterial
R2 = Rural = Minor Arterial	U2 = Urban-Minor Arterial
R3 = Rural-Collector	U3 = Urban-Collector
R4 = Rural-Unclassified	U4 = Urban-Unclassified
R5 = Rural-Interstate	U5 = Urban-Interstate

Legal Speed

D - Official speed limit as designated for decreasing direction of the roadway.
IB - Official speed limit as designated for increasing or both directions of the roadway.

TR — Terrain - The contour of the roadway as it relates to the frequency and steepness of hills and the effect on truck speed.

L = Level - Trucks maintain speed.
R = Rolling - Trucks slow down frequently.
M = Mountainous - Trucks slow to a crawl frequently.

PK — Parking Zone - Type of parking that is permitted on a State Route (cities only).

B = Both sides parking permitted
L = Left side parking only permitted
P = Parking prohibited on both sides
R = Right side parking only permitted
X = Prohibited during peak hours

ST — Street Name Alias - The local name of a street assigned to a State Route as the State Route passes through a city.

* = A street name alias is assigned to a State Route (The street name will appear in the description field).
$ = When the street name alias ends.

INTERSECTION DETAIL

SRMP	State Route Milepost at intersection.
B	“Back” milepost indicator.
ARM	Accumulated route mile at intersection.

TURN LANES

Entering an intersection would be “near approach.”
Leaving an intersection would be “far approach.”

LGT WD	Length and width will appear in each category of turn and acceleration lanes.
L NEAR	Left turn lane in near approach of intersection.
R NEAR	Right turn lane in near approach of intersection.
L FAR	Left turn lane in far approach of intersection.
R FAR	Right turn lane in far approach of intersection.

ACCELERATION LANES

LEFT	Left acceleration lane in near approach of intersection.
L CNTR	Acceleration lane in near approach of intersection.
R CNTR	Acceleration lane in far approach of intersection.
RIGHT	Right acceleration lane in far approach of intersection.

If you have any questions regarding the State Highway Log or the roadway data, or you can provide us with updated information, please contact the Roadway Data Office at (360) 570-2361 or fax (360) 570-2400. We are continuously looking for sources to provide us with quality information.
