

To Whom It May Concern:

Pre-estimate information available on the Construction Contract Payment Progress Reporting screen

On September 27, 2022, WSDOT added pre-estimate information (a listing of items that have been scheduled to be paid in a future progress payment) to the Construction Contract Payment Progress Reporting screen at <https://remoteapps.wsdot.wa.gov/construction/project/progress/>.

This tool allows users to view the progress payments made to date on any active WSDOT contract, and now also allows users to view future payment information. Items shown on pre-estimates **do not** guarantee payment on the next progress estimate as items can be deferred if necessary.

The information in the Construction Contract Payment Progress Reporting screen is updated daily and will change if additional payment information is entered by WSDOT staff. After a progress estimate payment is processed, the pre-estimate information will no longer be visible, and the final payment information will be available by selecting the most current Payment Date from the drop-down menu.
