

To Whom It May Concern:

The Governor's Proclamations 20-05 and 21-14 expired 10/31/2022. These proclamations declared a State of Emergency and required COVID vaccinations to perform WSDOT contract work.

Starting November 1st, 2022, WSDOT will no longer require COVID vaccinations for contractor personnel who primarily work outdoors on WSDOT construction projects. If you have been deferring bidding WSDOT work because of the requirements, please feel free to resume bidding on WSDOT projects.

At this time, we do not have a determination on whether there will be a continued vaccine requirement for contractors, consultants and volunteers who do not primarily work outdoors. Until additional guidance is provided, the vaccine requirement will remain in place for those individuals.
