

Good To Go![™] License Plate Pass

Installation Instructions

The **Good To Go!**[™] License Plate Pass is for exterior use and should be installed on your vehicle's front bumper using the same space as the license plate holder.

Required Supplies:

The **Good To Go!** License Plate Pass \ Screwdriver (flat head or Phillips depending on your vehicle's license plate mounting screws).

1 Remove:

Remove the screws from the license plate area of your front bumper. Remove the license plate and any plate frame or bracket.

2 Pass Position:

Hold the pass so that the etched lettering is facing you and the mounting holes are to the top, as shown in *Figure 1*.

- a. Position the front of the pass so that the dark rectangle is facing you and the back of the pass with the pass number is flat against the plate.

Do not use a license plate frame as it interferes with the pass reading.

- a. The license plate should be between the pass and the vehicle bumper. (*Figure 2*).
- b. Align the pass screw holes with the holes at the top of the license plate.

3 Fasten:

Position the pass so it covers the top area of the vehicle's license plate. The license plate should be between the pass and the vehicle bumper (*Figure 2*). Align the pass screw holes with the holes for your license plate.

Using the two hex screws and the hex key that came with your License Plate Pass, secure the pass and license plate to the vehicle bumper. (*Figure 3*).

NOTE: If your vehicle does not have a front license plate, install the pass in the area where the license plate would normally be mounted. If your vehicle does not have a front license plate area, contact Customer Service for other pass options (1-866-936-8246).
