

## MicroStation 201 Course Details

### Course Title

CAE: MICROSTATION - 201 PRODUCTION LEVEL

### LMS Course Code

WSDOT\_AI6

### Hours

24

### Course Type

Computer Aided Engineering

### Discipline(s)

Drafting, Design

### Course Description

This three day course covers the basic production workflow for developing a PS&E plan set with MicroStation. It includes developing and managing base plan datasets, referencing files, level filtering, creating sheet files per WSDOT practice, support group DGN files, vicinity maps, details, roadway profiles, and printing sheets per WSDOT practice.

### Learning Objectives

On completion of this course, participants will be able to:

1. Create a WSDOT standard CAE Project
2. Develop and manage a base plan dataset
3. Develop sheet files and reference base plan data into them
4. Print multiple selective sheets from WSDOT DGN sheet files.

### Pre Reqs

MicroStation - 101 Entry Level AX4
