

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: June 16, 2023  
Project End Date: June 15, 2028

Permit Number: 2023-9-8+01  
FPA/Public Notice Number: N/A  
Application ID: 31198

PERMITTEE	AUTHORIZED AGENT OR CONTRACTOR
WSDOT ATTENTION: Virginia Stone 310 Maple Park Ave SE Olympia, WA 98501-2348	

**Project Name:** WSDOT Marine Test Boring and Freshwater Geotechnical Survey (Statewide)

**Project Description:** Geo-technical exploratory drilling and investigative sampling is necessary to understand sub-surface soil characteristics, detect hazardous materials, monitor groundwater, determine the presence/absence of bedrock, and other information to effectively design structures such as bridges and culverts. The work consists of drilling a hold and removing a sediment plug.

## PROVISIONS

1. PROJECT DESCRIPTION: This HPA authorizes only geotechnical survey and sediment test boring and associated surveys in marine and freshwater environments to determine sub-surface material as described in application 31198. Any other work, or work that cannot comply with the provisions of this HPA, requires a separate written HPA.

2. Timing limitations: The project may begin June 16, 2023 and must be completed by June 15, 2028 provided:

- a. Work in freshwater must be conducted only during the time periods specified in the file "ALLOWABLE FRESHWATER WORK TIMES May 2018.docx" accessible within the application record.
- b. Work in saltwater or marine areas
  - i. Inter-tidal and subtidal sampling work may not occur from February 15 – August 15 of the authorized period for the protection of migrating juvenile salmonids provided: subtidal wet rotary sample boring completely containing drilling mud and other products is allowed year-round.
  - ii. Wet rotary sample boring, completely containing drilling mud and other products, may be acceptable above + 2 feet in reference to MLLW tidal datum during the authorized period provided:  
if a biologist approved by the Department of Fish and Wildlife does not detect forage fish eggs during a beach survey. Work must begin within seventy-two hours of survey, and you must complete the work within two weeks of the survey. The biologist must follow the department-approved intertidal forage fish spawning protocol and use the standard department data sheets when conducting forage fish spawning beach surveys. A list of certified biologists, the approved protocol and data sheets are available on the department's web site [http://wdfw.wa.gov/licensing/hpa/technical\\_assistance.html](http://wdfw.wa.gov/licensing/hpa/technical_assistance.html) . The biologist must submit the completed data sheets to the department within seventy-two hours of completing the survey to WDFW by e-mail at [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov); mail to Post Office Box 43234, Olympia, Washington 98504-3234; or fax to (360) 902-2946. In addition, the biologist must preserve the winnowed portion of the sediment samples and retain them for a minimum of four weeks. Sediment samples must be provided to WDFW staff upon request.

3. APPROVED PLANS: You must accomplish the work per plans and specifications submitted with the application and approved by the Washington Department of Fish and Wildlife, except as modified by this Hydraulic Project Approval. You must have a copy of these plans available on site during all phases of the project construction:

- a. WSDOT Design Environmental Compliance Assurance Procedure (ECAP) procedure in WSDOT's Design Manual Chapter 225.05.

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: June 16, 2023

Permit Number: 2023-9-8+01

Project End Date: June 15, 2028

FPA/Public Notice Number: N/A

Application ID: 31198

b. Installation of the appropriate (least impact) Best Management Practices (BMPs) to control erosion, sedimentation, and contain pollutants from entering the water body is required to prevent visible turbidity.

4. Notification: The permittee or contractor must notify the WDFW local habitat biologist <https://wdfw.maps.arcgis.com/apps/MapJournal/index.html?appid=48699252565749d1b7e16b3e34422271> and [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov) prior to starting work. Notification may be by email, facsimile (FAX), telephone, or in person. Notification must include:

- a) Agency name, contact person, and telephone number.
- b) Water body name.
- c) Work location including road number and milepost if applicable, or comparable site location information.
- d) Starting date and estimated ending date for work.
- e) Which BMPs are proposed to be applied.
- f) Results of the forage fish survey (if required).

5. FISH KILL/ WATER QUALITY PROBLEM NOTIFICATION: If a fish kill occurs or fish are observed in distress at the job site, immediately stop all activities causing harm. Immediately notify the Washington Department of Fish and Wildlife of the problem. If the likely cause of the fish kill or fish distress is related to water quality, also notify the Washington Military Department Emergency Management Division at 1-800-258-5990. Activities related to the fish kill or fish distress must not resume until the Washington Department of Fish and Wildlife gives approval. The Washington Department of Fish and Wildlife may require additional measures to mitigate impacts.

6. INVASIVE SPECIES CONTROL: Follow Method 1 for low risk locations (i.e. clean/drain/dry). Thoroughly remove visible dirt and debris from all equipment and gear (including drive mechanisms, wheels, tires, tracks, buckets, and undercarriage) before arriving and leaving the job site to prevent the transport and introduction of invasive species. For contaminated or high risk sites please refer to the Method 2 Decontamination protocol. Properly dispose of any water and chemicals used to clean gear and equipment. You can find this and additional information in the Washington Department of Fish and Wildlife's "Invasive Species Management Protocols", available online at <https://wdfw.wa.gov/species-habitats/invasive/prevention>.

## DRILLING ACTIVITIES

7. No other excavation or fill work is authorized under this HPA.

8. Woody material embedded in the bank, shoreline or bed must be left undisturbed and intact.

9. Intertidal wetland vascular plants and intertidal and sub-tidal eelgrass, macro algae or kelp must not be adversely impacted due to project activities (e.g., temporary floating work platform must not ground, anchors must not be set, equipment must not operate, and other activities must not occur in intertidal wetland vascular plants, intertidal and subtidal eelgrass, macro algae or kelp).

10. A casing or other water isolation device /BMP must be used to contain the boring operation and prevent water entry of all associated sediments and other materials, such as the water slurry used for drill lubrication and bentonite used to seal the bore hole after geo-technical data has been recorded and sampled. The discharge of visible turbid or slurry laden process water to state waters is not authorized by this HPA.

11. After geotechnical information has been logged, the bore hole and surface must be restored to pre-project condition. In freshwater, the top 18-24 inches of the bore hole must be filled with native streambed or imported streambed material as defined in 'WSDOT: Standard Specifications for Road, Bridge, and Municipal Construction - 2018, 9-03.11(1) Streambed Sediment'.

12. All waste material such as drill spoils and cuttings, construction debris, silt, excess dirt, excess gravel, or

Issued Date: June 16, 2023

Permit Number: 2023-9-8+01

Project End Date: June 15, 2028

FPA/Public Notice Number: N/A

Application ID: 31198

overburden resulting from this project must be deposited above the limits of flood water in an upland disposal site.

## EQUIPMENT

13. Drilling equipment must be checked daily for leaks, be well-maintained and kept in good repair to prevent the loss of lubricants, grease, and any other deleterious materials from entering the state waters.

14. Temporary floating work platforms must not ground on the bed of state waters.

15. No geared or drive mechanisms (tires, tracks) may enter the wetted perimeter. Truck mounted and tracked drilling equipment must work from a location outside of the wetted perimeter or from a temporary floating work platform.

16. Equipment, except for barges, must be parked above the Ordinary High Water Line (OHWL), or wetted perimeter (whichever is higher), each day after construction activities to prevent leakage or accidental spills into state waters.

17. All containers storing fuel or other deleterious substances on any temporary floating work platform must be secured to prevent incidental spills. Absorbent pads and spill response equipment must be present on all floating platforms with fuel storage and workers must be trained in its use.

18. The drilling water recycle system must be self-contained, operated, and maintained such that recycle water does not enter waters of the state.

19. Anchors must be set and retrieved vertically; anchor cable tension must be maintained such that anchor cables do not drag.

20. Limit disturbance to the shoreline when placing, using, or removing a temporary floating work platform.

21. No temporary floating work platform anchoring or grounding may occur that would disturb eelgrass, kelp, macro algae or intertidal wetland vascular plants.

## RIPARIAN PROTECTION

22. Care must be used when accessing the site to minimize the disturbance of vegetation. Vegetation must be straddled with heavy equipment and be pruned as necessary, without damaging the roots, or low ground pressure equipment must be used, when possible.

23. All woody plants that were on the banks or in the bed of state waters and that were removed or damaged by the work beyond their capability to regenerate must be replaced. Replacement of vegetation must be by replanting or natural recruitment with woody plants native to the area. Woody plants must be replaced and maintained at a ratio of at least 1:1 by the end of the first growing season after impact. If replacement plants fail, additional plantings, or natural recruitment is required prior to the next growing season to achieve and maintain at least 1:1 replacement. If trees with greater than 4-inch diameter at breast height are required to be removed, the replacement and maintenance ratio must be at least 4:1 by the end of the second growing season after impact. Cut woody vegetation must remain on site, be placed over the disturbed area, and must not be chipped or masticated.

24. Within seven calendar days of project completion, all disturbed areas must be protected from erosion using vegetation or other means. Erosion control methods may include, but are not limited to filter fabric and immediate mulching of exposed areas. Man-made materials (silt fence, sand bags, etc.) may not be placed such that they become subject to high flows or tidal waters.

25. ANNUAL REPORTING: A calendar year's annual report must be uploaded to Application ID 31198 in the Aquatic Protection Permitting System (APPS) in unlocked Microsoft Excel (\*.xlsx) format by February 28 of the following year.

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234

Issued Date: June 16, 2023  
Project End Date: June 15, 2028

Permit Number: 2023-9-8+01  
FPA/Public Notice Number: N/A  
Application ID: 31198

In the final year of the HPA, the report must be submitted prior to the expiration date. An annual report is also required if no work was conducted. (If APPS is replaced, the annual report may be emailed to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov).)

The annual report must include:

- a) Permittee, contact person, address, telephone number, date of report, time period.
- b) The permit number for this HPA, summary of the total number of individual projects by region and statewide.
- c) Problem(s) encountered: Such as inability to comply with provisions, lack of notification to WDFW, corrective action taken to rectify problems, and impacts to fish life and water quality from activity. If the Environmental Compliance Assurance Procedure (ECAP) or similar procedure was used, what activity triggered the procedure.
- d) Recommendations for improvement to best management practices and permit provisions.
- e) List of individual projects completed: By region including water body name, road number and milepost if applicable, latitude and longitude, start and end date of work, description of work.

## APPLY TO ALL HYDRAULIC PROJECT APPROVALS

This Hydraulic Project Approval pertains only to those requirements of the Washington State Hydraulic Code, specifically Chapter 77.55 RCW. Additional authorization from other public agencies may be necessary for this project. The person(s) to whom this Hydraulic Project Approval is issued is responsible for applying for and obtaining any additional authorization from other public agencies (local, state and/or federal) that may be necessary for this project.

This Hydraulic Project Approval shall be available on the job site at all times and all its provisions followed by the person (s) to whom this Hydraulic Project Approval is issued and operator(s) performing the work.

This Hydraulic Project Approval does not authorize trespass.

The person(s) to whom this Hydraulic Project Approval is issued and operator(s) performing the work may be held liable for any loss or damage to fish life or fish habitat that results from failure to comply with the provisions of this Hydraulic Project Approval.

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: June 16, 2023

Permit Number: 2023-9-8+01

Project End Date: June 15, 2028

FPA/Public Notice Number: N/A

Application ID: 31198

---

Failure to comply with the provisions of this Hydraulic Project Approval could result in civil action against you, including, but not limited to, a stop work order or notice to comply, and/or a gross misdemeanor criminal charge, possibly punishable by fine and/or imprisonment.

All Hydraulic Project Approvals issued under RCW 77.55.021 are subject to additional restrictions, conditions, or revocation if the Department of Fish and Wildlife determines that changed conditions require such action. The person(s) to whom this Hydraulic Project Approval is issued has the right to appeal those decisions. Procedures for filing appeals are listed below.

**MINOR MODIFICATIONS TO THIS HPA:** You may request approval of minor modifications to the required work timing or to the plans and specifications approved in this HPA unless this is a General HPA. If this is a General HPA you must use the Major Modification process described below. Any approved minor modification will require issuance of a letter documenting the approval. A minor modification to the required work timing means any change to the work start or end dates of the current work season to enable project or work phase completion. Minor modifications will be approved only if spawning or incubating fish are not present within the vicinity of the project. You may request subsequent minor modifications to the required work timing. A minor modification of the plans and specifications means any changes in the materials, characteristics or construction of your project that does not alter the project's impact to fish life or habitat and does not require a change in the provisions of the HPA to mitigate the impacts of the modification. If you originally applied for your HPA through the online Aquatic Protection Permitting System (APPS), you may request a minor modification through APPS. A link to APPS is at <http://wdfw.wa.gov/licensing/hpa/>. If you did not use APPS you must submit a written request that clearly indicates you are seeking a minor modification to an existing HPA. Written requests must include the name of the applicant, the name of the authorized agent if one is acting for the applicant, the APP ID number of the HPA, the date issued, the permitting biologist, the requested changes to the HPA, the reason for the requested change, the date of the request, and the requestor's signature. Send by mail to: Washington Department of Fish and Wildlife, PO Box 43234, Olympia, Washington 98504-3234, or by email to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov). You should allow up to 45 days for the department to process your request.

**MAJOR MODIFICATIONS TO THIS HPA:** You may request approval of major modifications to any aspect of your HPA. Any approved change other than a minor modification to your HPA will require issuance of a new HPA. If you originally applied for your HPA through the online Aquatic Protection Permitting System (APPS), you may request a major modification through APPS. A link to APPS is at <http://wdfw.wa.gov/licensing/hpa/>. If you did not use APPS you must submit a written request that clearly indicates you are requesting a major modification to an existing HPA. Written requests must include the name of the applicant, the name of the authorized agent if one is acting for the applicant, the APP ID number of the HPA, the date issued, the permitting biologist, the requested changes to the HPA, the reason for the requested change, the date of the request, and the requestor's signature. Send your written request by mail to: Washington Department of Fish and Wildlife, PO Box 43234, Olympia, Washington 98504-3234. You may email your request for a major modification to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov). You should allow up to 45 days for the department to process your request.

## APPEALS INFORMATION

# HYDRAULIC PROJECT APPROVAL

Washington Department of  
Fish & Wildlife  
PO Box 43234  
Olympia, WA 98504-3234  
(360) 902-2200

Issued Date: June 16, 2023

Permit Number: 2023-9-8+01

Project End Date: June 15, 2028

FPA/Public Notice Number: N/A

Application ID: 31198

---

If you wish to appeal the issuance, denial, conditioning, or modification of a Hydraulic Project Approval (HPA), Washington Department of Fish and Wildlife (WDFW) recommends that you first contact the department employee who issued or denied the HPA to discuss your concerns. Such a discussion may resolve your concerns without the need for further appeal action. If you proceed with an appeal, you may request an informal or formal appeal. WDFW encourages you to take advantage of the informal appeal process before initiating a formal appeal. The informal appeal process includes a review by department management of the HPA or denial and often resolves issues faster and with less legal complexity than the formal appeal process. If the informal appeal process does not resolve your concerns, you may advance your appeal to the formal process. You may contact the HPA Appeals Coordinator at (360) 902-2534 for more information.

**A. INFORMAL APPEALS:** WAC 220-660-460 is the rule describing how to request an informal appeal of WDFW actions taken under Chapter 77.55 RCW. Please refer to that rule for complete informal appeal procedures. The following information summarizes that rule.

A person who is aggrieved by the issuance, denial, conditioning, or modification of an HPA may request an informal appeal of that action. You must send your request to WDFW by mail to the HPA Appeals Coordinator, Department of Fish and Wildlife, Habitat Program, PO Box 43234, Olympia, Washington 98504-3234; e-mail to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov); fax to (360) 902-2946; or hand-delivery to the Natural Resources Building, 1111 Washington St SE, Habitat Program, Fifth floor. WDFW must receive your request within 30 days from the date you receive notice of the decision. If you agree, and you applied for the HPA, resolution of the appeal may be facilitated through an informal conference with the WDFW employee responsible for the decision and a supervisor. If a resolution is not reached through the informal conference, or you are not the person who applied for the HPA, the HPA Appeals Coordinator or designee may conduct an informal hearing or review and recommend a decision to the Director or designee. If you are not satisfied with the results of the informal appeal, you may file a request for a formal appeal.

**B. FORMAL APPEALS:** WAC 220-660-470 is the rule describing how to request a formal appeal of WDFW actions taken under Chapter 77.55 RCW. Please refer to that rule for complete formal appeal procedures. The following information summarizes that rule.

A person who is aggrieved by the issuance, denial, conditioning, or modification of an HPA may request a formal appeal of that action. You must send your request for a formal appeal to the clerk of the Pollution Control Hearings Boards and serve a copy on WDFW within 30 days from the date you receive notice of the decision. You may serve WDFW by mail to the HPA Appeals Coordinator, Department of Fish and Wildlife, Habitat Program, PO Box 43234, Olympia, Washington 98504-3234; e-mail to [HPAapplications@dfw.wa.gov](mailto:HPAapplications@dfw.wa.gov); fax to (360) 902-2946; or hand-delivery to the Natural Resources Building, 1111 Washington St SE, Habitat Program, Fifth floor. The time period for requesting a formal appeal is suspended during consideration of a timely informal appeal. If there has been an informal appeal, you may request a formal appeal within 30 days from the date you receive the Director's or designee's written decision in response to the informal appeal.

**C. FAILURE TO APPEAL WITHIN THE REQUIRED TIME PERIODS:** If there is no timely request for an appeal, the WDFW action shall be final and unappealable.

# WASHINGTON STATE

## Standard Hydraulic Project

AGENCY USE ONLY
Date Received: 2023-06-08
Application ID :31198
Online Submission
Amended Application

01. Application Information	<b>* Application Type:</b>
	Standard
	<b>* I am applying as a government agency, organization, or company for hydraulic projects anywhere within a broad geographic area but can't yet identify specific, discrete locations for those projects.</b>
	Yes
02. Project Identification	<b>* Site Description:</b>
	Various freshwater and marine sites across the state. Ferry terminals have coverage under a separate HPA.
	<b>* Are you applying for a long-term HPA for agricultural irrigation or stock watering purposes under RCW 77.55.021 (9)(c)?</b>
	No
03. Applicant	<b>* Project Name (A name for your project that you create. Examples: Smith's Dock or Seabrook Lane Development)</b>
	WSDOT Marine Test Boring and Freshwater Geotechnical Survey (Statewide)
	<b>* Simplified Project Type(s) (check all that apply):</b>
	Scientific Instruments
	<b>* Do you want to apply using simplified application form?</b>
	No
	<b>* Business Name (if applicable)</b>
	WSDOT
<b>* First Name</b>	
Virginia	
<b>* Last Name</b>	
Stone	
<b>* Address 1</b>	
310 Maple Park Ave SE	
<b>* City</b>	
Olympia	
<b>* State/Province</b>	
WA	
<b>* Zip Code (12345 or 12345-1234)</b>	
98501-2348	
<b>* Country</b>	

03. Applicant	United States
04. Applicant Account Type	<b>* Please select one applicant account type</b>
	Government – State
05. Authorized Agent or Contact	<b>* Business Name (if applicable)</b>
	WSDOT
	<b>* First Name</b>
	Virginia
	<b>* Last Name</b>
	Stone
	<b>* Address 1</b>
	310 Maple Park Ave SE

07. Project Location	<b>* Location</b>

07. Project Location	Site Name: Work Start Date: January 1, 1900 Work End Date: January 1, 1900  Address: , Statewide, WA, United States Latitude:   Longitude:  WRIA:   Stream Number:   Stream Name: Parcel No:   100 Year Flood: Drive Direction: -----
08. Project Description	<p><b>* Will you be operating equipment in water?</b></p> <p>Yes</p> <p><b>* Type of equipment used</b></p> <p>The type of equipment used depends on topography and access to the location of the required boring. Equipment may include: skill drill, helicopter rig, truck mounted drill, track mounted drill, portable barge, cone penetrometer test truck          Each drill will have a support truck for water, tooling, and other required supplies.</p> <p><b>* Summarize the overall project.</b></p> <p>Geo-technical exploratory drilling and investigative sampling is necessary to understand sub-surface soil characteristics, detect hazardous materials, monitor groundwater, determine the presence/absence of bedrock, and other information to effectively design structures such as bridges and culverts. The work consists of drilling a hold and removing a sediment plug.</p> <p><b>* Describe how you plan to construct each project element. Include specific construction methods and equipment to be used. Identify where each element will occur in relation to the nearest waterbody. Indicate which activities are within the 100-year flood plain.</b></p>

08. Project Description

Work will occur in the 100-year floodplain if freshwater locations and potentially require in-water work to collect the soil bore.

In freshwater sites the sampling procedure is as follows:

A 4 inch casing is sealed into the lake or river bottom. The test boring is advanced through that casing with a 3 inch casing.

At every 5 foot interval a split spoon sampler is lowered on a 2 1/4 inch rod through the 3 inch casing to the bottom of the hole for taking soil samples. This process is repeated to the required depth of the soil investigation.

The equipment used depends on topography and accessibility to the sites needed for sediment testing.

- The truck mounted drill will access boring locations that are on relatively flat, easy to access sites. Each drill will have a support truck for water, tooling, and other required supplies.
- The track mounted drill is a low ground pressure (2.5 pounds per square inch rubber and steel track vehicle). It is used to access soft ground areas and sites with uneven or rough terrain. Each drill will have a support truck for water, tooling, and other required supplies.
- The skid drill is a small machine for use in areas where access is difficult such as sites on slopes, small in size and/or have obstructions that cannot be transversed by the Truck Mounted Drill or Track Mounted Drill. It is typically set in place by a crane or boom truck. Each drill will have a support truck for water, tooling, and other required supplies.
- The Helicopter Rig is used when road access is limited. It is similar in nature to the Skid Drill and air lifted to the required location. Each drill will have a support truck for water, tooling, and other required supplies.
- Portable Barge is used when access is needed to an area within the waterbody where none of the above methods will work. It consists of hauling transportable pontoons to the vicinity by trailer and setting them into the water with a boom truck for assembly into a barge. Drills and support equipment are placed on the barge and moved into position for the drilling operation. The barge is held in place by four anchors. For operations in deep water, a truck mounted drill is placed on a large barge rented. Tug boats are used to maneuver the barge.
- The Cone Penetrometer test truck is used to send sound waves into the ground to determine the density of material underground. It use an electronic instrumented cone assembly, hollow core sounding rods, a 20 ton hydraulic thrust frame, and a computer data acquisition/processing system to perform the analysis. This is a self contained unit mounted on a truck. The system can be used from a barge for testing when there are deep soft sediment on the river or lake bottom.

In marine sites the sampling process is as follows:

The sampling procedure is as follows:

A 4 inch casing is sealed into the lake or river bottom. The test boring is advanced through that casing with a 3 inch casing.

At every 5 foot interval a split spoon sampler is lowered on a 2 1/4 inch rod through the 3 inch casing to the bottom of the hole for taking soil samples. This process is repeated to the required depth of the soil investigation.

See type of equipment used above.

**\* Requested Project Start Date:**

06/08/2023

**\* Requested Project End Date:**

06/07/2028

09. Waterbodies (other than wetlands): Impacts and Mitigation

**\* Describe how the project is designed to avoid and minimize adverse impacts to the aquatic environment.**

Potential impacts may include minor disturbance to aquatic and riparian vegetation while accessing the site. When possible, vegetation will not be removed, but will be driven over, or pruned out of the way, to allow for regeneration of the plant(s). When accessing wetland areas, temporary work mats will be used to minimize soil compaction and impacts to plant material. Riparian woody vegetation disturbed beyond its point to recover will be replaced provided the replacement plant will not create safety issues for the traveling public, or impede maintenance personnel from performing routine maintenance activities on WSDOT structures. In areas where natural revegetation of the disturbed area is anticipated, planting of woody species may be waived and the site monitored for recruitment of volunteer species.

Revegetation may also be done at a later date under the construction of the actual project. Sedimentation and erosion could be associated with soil disturbance along the bank caused by access to the site, setting up equipment, removing equipment from the site or other factors. All disturbed areas will be treated with the appropriate Best Management Practices (BMPs) for the control of sedimentation and erosion.

The bed of the water body will be disturbed by the placement of the drilling shaft. This will be negligible due to the small size of the shaft (4" in diameter). A small amount of turbidity may be associated with placing, extending, and removing the boring shaft. This would be considered negligible and no Best Management Practices (BMPs) are being recommended.

Aquatic life, including fish, in the immediate vicinity of the operation may be affected by the noise associated with setting up the drill rig, the boring operation, and removal of the equipment from the site or by the use of a cone penetrometer. Impacts, although minimal, to the spawning beds could be associated with the installation of the drilling shaft. To minimize potential impacts to fish, work will be performed during WDFW's in-water work windows.

Water quality could be impacted if there was a spill or leak of fluids used to operate the drilling rig. Proper Best Management Practices (BMPs) will be utilized to ensure any spills or leaks are contained and not released into the water body.

In the event of a non-compliance event, WSDOT's Environmental Compliance Assurance Procedure (ECAP) will be followed.

**\* Will your project impact a waterbody or the area around a waterbody?**

Yes

**\* Describe how your project will impact a waterbody or the area around a waterbody.**

Potential impacts may include minor disturbance to aquatic vegetation while accessing the site. Sedimentation and erosion could be associated with soil disturbance along the bank caused by access to the site, setting up equipment, removing equipment from the site or other factors. All disturbed areas will be treated with the appropriate Best Management Practices (BMPs) for the control of sedimentation and erosion.

The bed of the water body will be disturbed by the placement of the drilling shaft. This will be negligible due to the small size of the shaft (4" in diameter). A small amount of turbidity may be associated with placing, extending, and removing the boring shaft. This would be considered negligible and no Best Management Practices (BMPs) are being recommended.

**\* Describe impact(s) that cannot be avoided through project design and implementation. For each location, please include the following: General location description where the impact(s) will occur (e.g. stream bank, beach front, 2-foot strip from bank, portion of gravel bar, etc.) Provide length, quantities, and/or area of impact**

See above.

09. Waterbodies (other than wetlands): Impacts and Mitigation	<p><b>* Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies?</b></p> <p>NA</p> <p><b>* Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies?</b></p> <p>A mitigation plan is not required because geotechnical work down not require compensatory mitigation.</p> <p><b>* Describe the source and nature of any fill material, amount (in cubic yards) you will use, and how and where it will be placed into the waterbody.</b></p> <p>Fill will consist of placing bentonite clay or other material to fill in and cap exploratory hole.</p> <p><b>* For all excavating or dredging activities, describe the method for excavating or dredging type and amount of material you will remove, and where the material will be disposed.</b></p> <p>Excavated (drilled) material will be disposed of offsite.</p>
10. SEPA Compliance	<p><b>* Compliance with the State Environmental Policy Act (SEPA). For more information about SEPA, go to "<a href="http://www.ecy.wa.gov/programs/sea/sepa/e-review.html">http://www.ecy.wa.gov/programs/sea/sepa/e-review.html</a>"</b></p> <p>This project is exempt. I will upload, mail, or deliver a draft of the SEPA Letter of Exemption as part of this application.</p> <p><b>* Choose Type Of Exemption.</b></p> <p>Categorical Exemption</p> <p><b>* Under what section of the SEPA administrative code (WAC) is it exempt?</b></p> <p>WAC 197-11-800(17)</p>
