

Estimated travel times for key local routes after WABN completion

Note: Locations shown on map are approximate.

Key Findings

- Travel times on local routes were longer under pre-toll scenario.
- On average, local travel times will be approximately the same.

Pre-toll compared to 2016 No Build Travel Time Benefit:

- Southbound travel times have improved on Montlake Boulevard
- Travel time to SR 520 eastbound have improved
- Northbound travel times are slightly longer during the evening commute period

2016 No Build compared to 2016 WABN:

- Morning travel times after WABN is operational will be similar to 2012 travel times
- Eastbound off-ramp to Montlake Boulevard will improve after WABN is operational
- Northbound travel during the evening commute will be slightly longer after WABN is operational
- Signal efficiency allows more traffic to reach arterial rather than being congested on eastbound off-ramp
