Description of Work – Provide a summary description of project.

Justification or Supporting Information

Cost Effectiveness Determination

• Attach a summary level estimate.

• Provide an explanation of cost effectiveness (see Public Interest Finding Example, Appendix 44.82).

Schedule Issues – Explain how the agency will deliver the project and describe if there is a benefit to the public for early completion.

Buy America Compliance
• Steel and iron that is permanently incorporated into the project shall consist of American-made materials, as outlined in the required GSP.

• The local agency must include a provision containing the “Buy-America” requirements in each contract. General Special Provisions similar to those now used by WSDOT can be used by the local agency. These general special provisions are included in the WSDOT Amendments and General Special Provisions publication.

• Purchase of foreign steel and iron products by local agencies for installation on a federally funded project is not allowed except to the limit allowed by the “Buy America” General Special Provision.

• The agency must document the sources of steel and iron by having a “Certification of Materials Origin” on file.

**Conclusion**

• A brief summary of the overall benefits and cost effectiveness.

• Approval by WSDOT Highways and Local Programs is required.

• Approval is dependent on demonstration of overall cost effectiveness and public benefit. The determination is not solely dependent on cost savings.

• At least one signature from the local agency is required.
