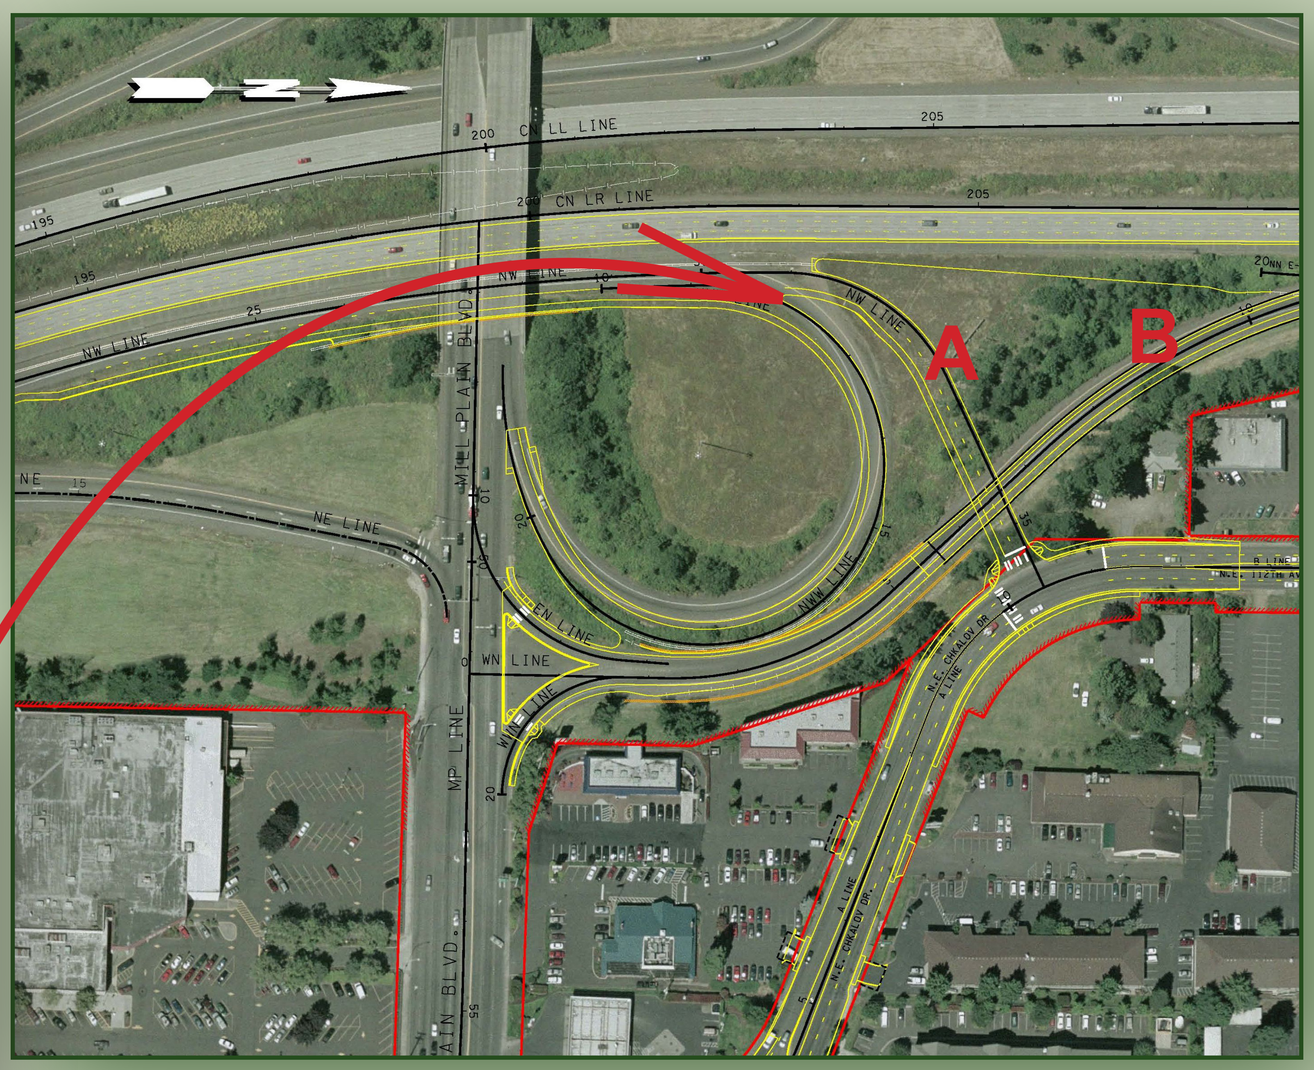
Washington State Department of Transportation

I-205 - Mill Plain Exit - 112th Connector

Before

After



Why is this project needed?

- Congestion at Mill Plain and Chkalov Drive, combined with high volumes of traffic exiting northbound I-205 onto Mill Plain during peak travel times, results in congested freeway off-ramps.

- The Mill Plain Boulevard off-ramp has been identified as a High Accident Location. This project will address congestion at the off-ramp intersection, helping to reduce accident rates.

The End Result:

- **NE 112th Avenue Connection (A)**
  A direct connection to NE 112th Avenue from the off-ramp of northbound I-205 to westbound Mill Plain Boulevard will reduce congestion at Mill Plain and Chkalov Drive.

- **I-205 Northbound On-ramp (B)**
  A bridge over the NE 112th Connector will provide space for the new direct connection to NE 112th Avenue and allow the future off-ramp to NE 18th Street to pass underneath.

- **Improved Mobility and Safety**
  For all vehicles traveling on this section of I-205.

"Washington's Future Just Got Better"

MAKING EVERY DOLLAR COUNT.

IT'S YOUR NICKEL. WATCH IT WORK.
