

Construction effects

Construction traffic management

- During peak traffic periods, two eastbound and three westbound mainline traffic lanes will remain open during construction.
- Mainline lane closures will be limited to nights and weekends.
- Ramps will remain open during peak traffic periods except:
 - Westbound on-ramps at the Bellevue Way and 108th Avenue NE interchanges may be closed temporarily. Only one of these ramps will be allowed to be closed at a time.

We're continuing to evaluate ways to minimize construction effects.

Crews work on the I-405 Corridor Program
