

Five bald eagle nests near SR 520 are from 900 feet to 2,400 feet away from the roadway.

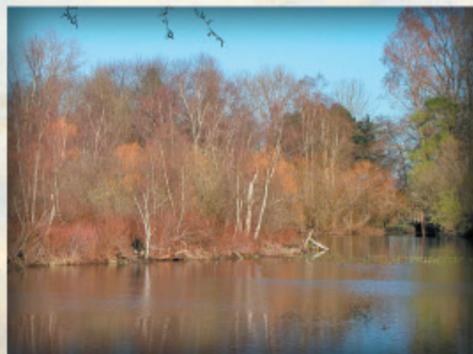

Active and passive recreation at the Arboretum.

Birds such as ducks, Canada geese, grebes, bald eagles, and great blue herons forage in the open waters of Lake Washington and Portage Bay.

Parks and other protected areas provide wildlife habitat.

Forested wetlands like these on Lake Washington provide habitat for wood ducks, beavers, and frogs.

Wintering wood ducks in the Arboretum.

Bald eagles and great blue herons use the Yarrow Bay wetland.

Wildlife Species and Habitats in the Project Area

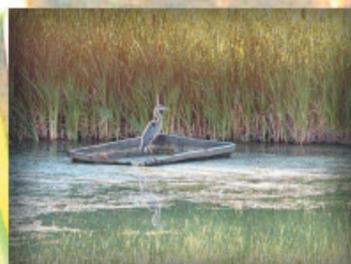

Washington Park Arboretum

Yarrow Bay wetland

Blue herons on Foster Island.

Eastside creeks such as Yarrow Creek contain habitat for coho salmon and cutthroat trout. Chinook salmon have been found in creeks downstream from SR 520.
