

South Holgate Street to South King Street Viaduct Replacement Project Comment Form

The Federal Highway Administration (FHWA) and the Washington State Department of Transportation (WSDOT) welcome your comments on the environmental assessment for the South Holgate Street to South King Street Viaduct Replacement Project. Please respond to the below questions and drop them in a comment box, or return to the address listed on the other side. To be considered as part of the official hearing period, comments must be postmarked by Aug. 11, 2008.

WSDOT studied a number of factors during the environmental assessment process, such as transportation, land use, visual quality and air quality. Do you have comments on any of our findings?

I-006-001

JUST BUILD IT.

It seems the extensive public show times show boards/staff gathered after hours are ~~the~~ part of lengthening the time it takes to get the viaduct replaced with something better.

JUST BUILD IT.

Do you have any additional comments on the environmental assessment?

I-006-002

Seems good, from a lay person's perspective. It would be good to get a decision on the central part of the viaduct (TUNNEL!) and get going on that too.

I-006-001

WSDOT and FHWA, in cooperation with the City of Seattle, are working to move ahead with replacing the section of the viaduct between S. Holgate Street and S. King Street. We look forward to starting construction in mid-2009.

I-006-002

The State of Washington, King County, and the City of Seattle are working together to find a solution for the central waterfront section of the viaduct. However, the Environmental Assessment for the S. Holgate Street to S. King Street Viaduct Replacement Project does not address the scenarios being evaluated for the central waterfront. Comments on the central waterfront project have been shared with the central waterfront team, and any future comments can be submitted to viaduct@wsdot.wa.gov.
