---

### ***Target Audience***

This training is targeted toward engineers, designers, planners, and project managers who work with highway access related issues.

### ***Course Description***

This course will discuss access management in Washington State. It will discuss limited access and managed access programs, rules, and requirements. The course will cover the following topics:

An overview of the types of access control and how they relate to WSDOT and local agency functions:

#### **Limited Access**

- Brief history of limited access
- Different levels of limited access control and what they mean
- Road approach types
- RCW's and WAC's related to limited access
- How limited access rights are obtained
- Hypothetical situations

#### **Managed Access**

- Brief history of managed access
- Different levels of managed access control
- RCW's and WAC's related to managed access
- Road approach permits
- Hypothetical situations

### ***Instructor***

**LeRoy Patterson:** Mr. Patterson has 15 years with WSDOT, with experience in Bridge, Traffic, Traffic Operations, Construction, Design, Developer Services, and Access and Hearings.
