

ACEC/WSDOT Structures Team Design Review Services

The ACEC/WSDOT Structures Team is composed of senior bridge engineers who are available to provide design review during all design phases of a project. This service is available for Owners, Local Agencies, State Agencies and Consultant Firms. The design review could involve all or several aspects of a project or very specific design and/or constructability issues.

To improve the effectiveness and timeliness of communication, prepare requests and presentations in accordance with this guide. Input can be provided during any phase of the project development process. For example, review could be provided during development of:

- Project planning phase
- Project specific Design Criteria
- Type, Size and Location studies
- Permitting submittal and/or Preliminary Plans
- Final design details, plans and specifications

To request a project design review please contact:

Geoff Swett, PE,SE - Bridge Engineer
WSDOT Bridge and Structures Office
360-705-7157
swettg@wsdot.wa.gov

Provide pertinent information (in PDF format) to the contact above prior to the scheduled ACEC/WSDOT Structures Team meetings. Meeting schedule and locations are posted at <http://www.wsdot.wa.gov/bridge/acec/>

Pertinent information shall include a list of specific questions for the Team and may include some or all of the following:

- Overall project layout
- Design Criteria
- Applicable structure plans and/or provisions
- Applicable Bridge Design Manual and/or Code references
- Project summary (single sheet)
- Unique project constraints
- Proposed timeline for advertisement and work

The project team, including key design staff, is expected to present their project before the ACEC/WSDOT Structures Team on the scheduled meeting date. Please keep presentation lengths to a maximum of 20-minutes.

The ACEC/WSDOT Structures Team will provide verbal feedback during the meeting and written comments within 3-5 business days.
