

# WSDOT Safety Program Survey 2008

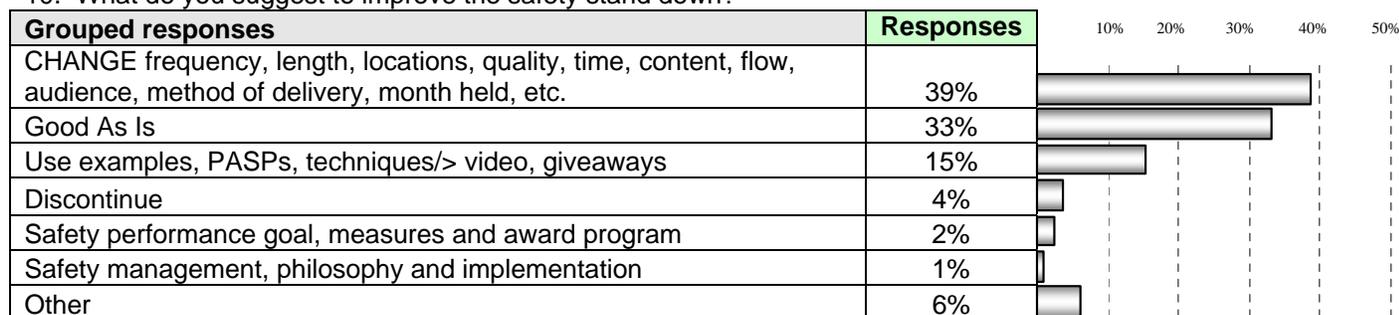

Total Respondents: **1644**

1. Who has the most influence on you to work safely?

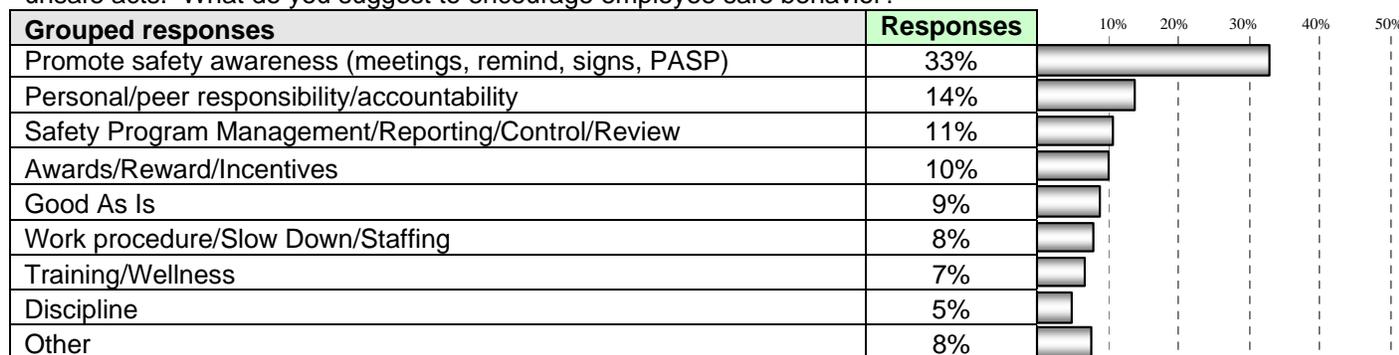

Executive	4%	Supervisor	20%	Safety staff	7%	You or your family	72%	Other	9%
-----------	----	------------	-----	--------------	----	--------------------	-----	-------	----

Questions	Responses	
	Yes	No
2. Does WSDOT's safety program change your behavior to work more safely?	74%	26%
3. Would your focus on safety be any different if WSDOT did not have a monetary safety recognition award?	16%	84%
4. Have you or a co-worker not reported an injury for fear of repercussions?	9%	91%
5. Do you believe that workers and their supervisors pay adequate attention to preparing Pre-activity Safety Plans (PASP) or its equivalent in the Ferries Safety Management System?	79%	21%
6. Did you receive safety training in recognizing job hazards and ways to prevent or avoid them?	90%	10%
7. Did you receive adequate training in recognizing hazards that can cause sprains and strains and how to prevent or avoid them?	88%	12%
8. Did you receive adequate training in recognizing hazards that can cause hearing loss and how to prevent or avoid them?	89%	11%
9. Do you think that the annual safety stand down is worthwhile with respect to maintaining focus on our safety program?	75%	25%

10. What do you suggest to improve the safety stand down?

11. Most accidents are due to a combination of unsafe conditions and unsafe acts, but primarily, unsafe acts. What do you suggest to encourage employee safe behavior?

12. Any other comments to improve the WSDOT safety program?
