## **Washington State Department of Transportation Ferries Division, Information Services Enterprise Security System Upgrade**

### **Advertisement/Public Notification**

The Washington State Department of Transportation (WSDOT) intends to release a Request for Proposal (RFP) for an Enterprise Security System Upgrade for the Ferries Division during July 2011.

#### **Background**

Under the RFP, WSDOT plans to solicit Vendors interested in providing proposals for a Contract to provide an update to the Ferries' current Enterprise Security System with a new Commercial Off-the-Shelf (COTS) enterprise security system. Proposals will be required to include additional functionality and capabilities as indicated in the acquisition for a seamless integrated system to meet the expanding needs and requirements of WSDOT.

#### **History**

The pending RFP is a follow-up to the Request for Information (RFI) for WSDOT Maritime Security Management System (MSMS) released on May 28, 2010 as WSDOT ACQ-2010-0515-RFI.

#### **Objectives**

The objective of the Enterprise Security System Upgrade project will be to provide functionality to manage and monitor access control, alarm and sensor events, and provide video surveillance, at forty-three (43) sites within Ferries Division. In addition, updates will provide for replacement of the ID credential/badging system, the ability for TWIC credential verification, smart video analytics, integrated high definition video, integration with a key management system, maps, optional updates to any End-Of-Life (EOL) hardware, and overall performance and reliability enhancements to the overall system.

Prospective submitters are encouraged to visit the WSDOT Administrative Services Contracts Office website at <http://www.wsdot.wa.gov/business/contracts/default.htm>
