

# SR 3 – BELFAIR BYPASS

## Environmental Assessment

January 2013

U. S. Department of Transportation  
Federal Highway Administration

Washington State  
Department of Transportation

**The following persons may be contacted for additional information:**

**Dean Moberg, P.E., FHWA Area Engineer  
Environmental Manager**  
711 South Capitol Way, Suite 501  
Olympia, WA 98501  
Telephone 360-534-9344

**Jeff Sawyer, Environmental &  
Hydraulics Services Manager**  
**WSDOT Olympic Region**  
P.O. Box 47375  
Tumwater, WA 98501-5592  
Telephone 360-570-6701

Copies of this EA are available from WSDOT (360-570-6700) at a cost to cover printing and mailing. CD versions are \$2.05 each, and hard copies are \$25.00 each.

# TABLE OF CONTENTS

**Executive Summary..... ES - 1**

ES1 Where is the SR 3 Belfair Bypass project located? ..... ES - 1

ES2 Why is this project important? ..... ES - 1

ES3 What is the purpose of the project, and why is it needed? ..... ES - 2

ES4 Is this project included in the adopted planning documents for the region? ..... ES - 2

ES5 What benefits would the Build Alternative provide? ..... ES - 2

ES6 Who is leading the project? ..... ES - 3

ES7 Who else participated in developing this environmental assessment? ..... ES - 3

ES8 What alternatives are evaluated in this EA? ..... ES - 3

ES9 What is the No Build Alternative? ..... ES - 3

ES10 What is the Build Alternative? ..... ES - 4

ES11 When would the project begin and end? ..... ES - 4

ES12 What would happen if the Build Alternative is not constructed? ..... ES - 4

ES13 How would the Build Alternative affect the project environment? ..... ES - 4

    ES13.1 Transportation (see Section 3.5) ..... ES - 4

    ES13.2 Highway Sound (see Section 3.6) ..... ES - 5

    ES13.3 Air Quality (see Section 3.7) ..... ES - 5

    ES13.4 Wetlands (see Section 3.8) ..... ES - 5

    ES13.5 Fish (see Section 3.9) ..... ES - 6

    ES13.6 Wildlife (see Section 3.10) ..... ES - 6

    ES13.7 Vegetation (see Section 3.11) ..... ES - 6

    ES13.8 Water Resources (see Section 3.12) ..... ES - 7

    ES13.9 Land Use, Farmland (see section 3.13) ..... ES - 7

    ES13.10 Relocation (see Section 3.14) ..... ES - 7

    ES13.11 Relocation (see Section 3.15) ..... ES - 7

    ES13.12 Social, Economics, and Environmental Justice (see Section 3.16) ..... ES - 8

    ES13.13 Hazardous Materials (see Section 3.17) ..... ES - 8

    ES13.14 Archaeological and Historic Resources (see Section 3.18) ..... ES - 8

    ES13.15 Public Services and Utilities (see Section 3.19) ..... ES - 8

ES13.16 Visual Quality (see Section 3.20) .....	ES - 9
ES13.17 Geology and Soils (see Section 3.21).....	ES - 9
ES14 What mitigation is proposed for the Build Alternative? .....	ES - 9
ES15 What issues are controversial? .....	ES - 11
ES16 How can you get involved? .....	ES - 11

**CHAPTER 1: Introduction ..... 1 - 1**

1.1 Where is the project located? .....	1 - 1
1.2 What is the Belfair Bypass project?.....	1 - 1
1.3 What is the purpose of this project?.....	1 - 1
1.4 What conditions are driving the need for this project? How will the proposed action fit into the system linkage? .....	1 - 4
1.5 What is the planning history of the SR 3 Belfair Bypass project? .....	1 - 6
1.6 What are the project termini and why are they logical?.....	1 - 8
1.7 Will this project accomplish the overall need of State Route 3? .....	1 - 8
1.8 Who is the project proponent and lead agency? .....	1 - 9
1.9 Why was the EA environmental document chosen? .....	1 - 9
1.10 What are the typical steps in the environmental assessment process? .....	1 - 9
1.11 What decisions must be made? .....	1 - 10
1.12 How can you be involved in this decision? .....	1 - 10
1.13 How long will the Build Alternative take to build?.....	1 - 11
1.14 What will the Build Alternative cost to build?.....	1 - 11
1.15 What approvals, permits, and consultations will be needed before construction begins? .....	1 - 12
1.16 What information is in the remainder of this document? .....	1 - 13

**CHAPTER 2: Description of the Alternatives ..... 2 - 1**

2.1 Introduction.....	2 - 1
2.2 What alternatives are under consideration in this environmental assessment?.....	2 - 1
2.2.1 What is the Build Alternative?.....	2 - 1
2.2.2 Description from south to north.....	2 - 4

2.3 How was the proposed alternative selected? What alternatives were considered but dismissed from further consideration? ..... 2 - 5

2.3.1 Selection of the alignment ..... 2 - 6

2.3.2 Selection of the connection designs..... 2 - 7

2.3.3 Transportation Demand Management ..... 2 - 8

2.4 What environmental consequences may be expected from the proposed Build Alternative and the No Build Alternative? ..... 2 - 9

**CHAPTER 3: Existing Environment, Direct Effects, and Mitigation ..... 3 - 1**

3.1 Introduction..... 3 - 1

3.1.1 What are the types of environmental effects? ..... 3 - 1

3.1.2 What are mitigation measures? ..... 3 - 2

3.1.3 What technical studies were prepared and where can I review them? ..... 3 - 2

3.1.4 Will the Build Alternative have any effects on the environment that cannot be fully mitigated? ..... 3 - 3

3.2 What environmental elements will not be affected by the alternatives in this environmental assessment? ..... 3 - 3

3.3 Why do we study environmental effects and involve the public in project decisions?.... 3 - 3

3.4 What areas of effect are addressed in this environmental assessment?..... 3 - 4

3.5 Transportation..... 3 - 4

3.5.1 What assumptions are in the current traffic analysis? ..... 3 - 4

3.5.2 How do the two alternatives compare in their ability to move people and goods now and in 2035? ..... 3 - 5

3.5.3 How is the traffic in the SR 3 Belfair Bypass project study area predicted to grow between now and 2035? ..... 3 - 8

3.5.4 Are there any safety issues in the SR 3, Belfair Bypass study area now or in the year 2035? ..... 3 - 8

3.5.5 How would the Build Alternative affect the connections with local roads and intersections? ..... 3 - 9

3.5.6 How would the Build Alternative affect transit and school bus routes? ..... 3 - 12

3.5.7 How would the project affect bicycle and pedestrian traffic? ..... 3 - 12

3.5.8 How would the traffic flow be affected during construction of the Build Alternative?..... 3 - 13

3.5.9	Would local streets be closed during construction?.....	3 - 13
3.5.10	What route would be used to haul construction materials? .....	3 - 13
3.5.11	Would the Build Alternative have unavoidable adverse effects to transportation that cannot be fully mitigated?.....	3 - 14
3.6	Highway Traffic Noise .....	3 - 14
3.6.1	What is the nature of highway noise?.....	3 - 14
3.6.2	What is the study area for the noise analysis? .....	3 - 15
3.6.3	How is highway noise measured? .....	3 - 15
3.6.4	What are some typical noise levels for comparison? .....	3 - 15
3.6.5	What are the general results of the noise study?.....	3 - 15
3.6.6	How loud would construction activities be?.....	3 - 19
3.6.7	When is noise mitigation considered for highway projects? .....	3 - 20
3.6.8	Is any noise mitigation proposed in the corridor to reduce traffic noise? .....	3 - 20
3.6.9	Would the Build Alternative have unavoidable adverse highway noise-related effects that could not be fully mitigated? .....	3 - 20
3.7	Air Quality.....	3 - 21
3.7.1	What is the existing air quality in the project area? .....	3 - 21
3.7.2	How would air quality be affected if the project is not built?.....	3 - 22
3.7.3	Would the Build Alternative affect air quality? .....	3 - 22
3.7.4	How would the project address Mobile Source Air Toxic (MSAT) emissions?.....	3 - 23
3.7.5	How would construction affect air quality and how would the effects be minimized?.....	3 - 24
3.7.6	Would the air quality for the Build Alternative be in conformance with state and federal regulations? .....	3 - 26
3.7.7	Would the project have unavoidable adverse effects on air quality that could not be fully mitigated? .....	3 - 26
3.8	Wetlands .....	3 - 27
3.8.1	Why and how are wetlands protected? .....	3 - 27
3.8.2	How would the Build Alternative affect existing wetlands?.....	3 - 28
3.8.3	How would WSDOT compensate for lost wetlands? .....	3 - 30
3.8.4	Would the Build Alternative have unavoidable adverse effects on wetlands that could not be fully mitigated? .....	3 - 31

3.9 Fish .....	3 - 31
3.9.1 What is the Endangered Species Act? .....	3 - 31
3.9.2 Studies, coordination, and methods.....	3 - 31
3.9.3 Are there threatened and endangered species in the study area and how are they impacted? .....	3 - 32
3.9.4 Are there any fish resources in the study area and how are they protected?.....	3 - 32
3.9.5 If the project is not built, what would be the existing conditions for fish? .....	3 - 32
3.9.6 How would fish be affected during construction of the Build Alternative? .....	3 - 33
3.9.7 What other effects would occur under the Build Alternative after construction?.....	3 - 33
3.9.8 How would we offset the effects to protected fish? .....	3 - 33
3.9.9 Would the project have unavoidable adverse effects on fish that could not be fully mitigated?.....	3 - 33
3.10 Wildlife.....	3 - 34
3.10.1 Studies, coordination, and methods.....	3 - 34
3.10.2 Are there threatened and endangered species in the study area? .....	3 - 35
3.10.3 Are there wildlife resources in the study area? .....	3 - 35
3.10.4 If the project is not built, how would wildlife be affected?.....	3 - 36
3.10.5 How would wildlife be affected during construction of the Build Alternative? ...	3 - 36
3.10.6 What other affects would occur under the Build Alternative after construction?.....	3 - 36
3.10.7 How would we offset the effects to protect wildlife?.....	3 - 37
3.10.8 Would the Build Alternative have unavoidable adverse effects on wildlife that could not be fully mitigated? .....	3 - 38
3.11 Vegetation.....	3 - 38
3.11.1 What vegetation is found in the study area? .....	3 - 38
3.11.2 Studies, coordination, and methods.....	3 - 39
3.11.3 Are threatened and endangered species found in the project area?.....	3 - 40
3.11.4 Are noxious weeds present in the study area? .....	3 - 40
3.11.5 If the project is not built, how would vegetation be impacted? .....	3 - 40
3.11.6 How would vegetation be affected during construction of the Build Alternative?.....	3 - 40

3.11.7	What other effects would occur under the Build Alternative after construction?.....	3 - 41
3.11.8	Would the project have unavoidable adverse effects on vegetation? .....	3 - 41
3.12	Water Resources .....	3 - 42
3.12.1	What are water resources and why are they important? .....	3 - 42
3.12.2	Are there water resources in the study area? .....	3 - 42
3.12.3	Studies, coordination, and methods.....	3 - 45
3.12.4	What regulations do we follow when dealing with water resources? .....	3 - 45
3.12.5	What effects would result under the No Build Alternative? .....	3 - 46
3.12.6	How would water resources be affected during construction of the Build Alternative? .....	3 - 47
3.12.7	What other effects would occur under the Build Alternative after construction?.....	3 - 49
3.12.8	How would we offset the effects to water resources during construction? .....	3 - 49
3.12.9	Would the project have unavoidable adverse effects on water resources that could not be fully mitigated? .....	3 - 50
3.13	Land Use and Farmland .....	3 - 50
3.13.1	What types of land use are in the study area? .....	3 - 50
3.13.2	What are the currently adopted regional and local land uses and transportation plans in the study area? .....	3 - 52
3.13.3	Studies, coordination, and methods.....	3 - 54
3.13.4	What regulations do we follow when dealing with land use and farmland? .....	3 - 55
3.13.5	What effects would result under the No Build Alternative? .....	3 - 55
3.13.6	How would land use and farmland be affected by the Build Alternative?.....	3 - 56
3.13.7	How would we offset the effects to land use and farmlands during construction? .....	3 - 56
3.13.8	Would the project have unavoidable adverse effects on land use and farmland that could not be fully mitigated? .....	3 - 57
3.14	Recreation Lands .....	3 - 57
3.14.1	Studies, coordination, and methods.....	3 - 57
3.14.2	What regulations do we follow when dealing with recreation lands? .....	3 - 58
3.14.3	What Section 4(f) resources and other recreation facilities are located within the study area? .....	3 - 58

3.14.4	What effects would result under the No Build Alternative? .....	3 - 61
3.14.5	How would recreation lands be affected by the Build Alternative? .....	3 - 61
3.14.6	How would the effects to Section 4(f) lands be avoided, minimized, or mitigated? .....	3 - 64
3.15	Relocation .....	3 - 65
3.15.1	Studies, coordination, and methods.....	3 - 65
3.15.2	What regulations do we follow when dealing with relocations of residential and commercial property? .....	3 - 65
3.15.3	What effects to relocation would result under the No Build Alternative? .....	3 - 66
3.15.4	What effects to relocations would result by the Build Alternative? .....	3 - 66
3.15.5	What other effects would occur under the Build Alternative after construction?.....	3 - 66
3.15.6	Are replacement housing and commercial business sites available in the study area? .....	3 - 67
3.15.7	Would the project have unavoidable adverse effects on housing and business property availability that could not be fully mitigated? .....	3 - 68
3.16	Social, Economics, and Environmental Justice .....	3 - 68
3.16.1	What is environmental justice and how do we deal with it? .....	3 - 68
3.16.2	What are the existing conditions in the study area and how were they assessed?.....	3 - 71
3.16.3	Which of the existing condition elements apply to low income, minority, elderly, or disabled populations? .....	3 - 74
3.16.4	What effects would result under the No Build Alternative? .....	3 - 75
3.16.5	How would Social, Economic, and Environmental Justice be affected during construction of the Build Alternative?.....	3 - 76
3.16.6	What other effects would occur under the Build Alternative after construction?.....	3 - 77
3.16.7	What measures are proposed to minimize or avoid effects to social and economic resources?.....	3 - 77
3.16.8	Would the project have unavoidable adverse effects on environmental justice that could not be mitigated?.....	3 - 78
3.17	Hazardous Materials.....	3 - 79
3.17.1	What hazardous materials could be present in the study area and what impacts could they cause? .....	3 - 79

3.17.2	What are the existing conditions of the study area?.....	3 - 79
3.17.3	What regulations do we follow when dealing with hazardous materials? .....	3 - 80
3.17.4	How were hazardous materials and wastes identified and evaluated within the project area? .....	3 - 80
3.17.5	Are there any potentially contaminated sites in the project area? .....	3 - 81
3.17.6	Would the project affect any hazardous materials sites? .....	3 - 81
3.17.7	What measures are proposed to avoid or minimize effects from hazardous materials during construction and operation? .....	3 - 81
3.17.8	What plans and measures would be in place in case of a hazardous spill during construction? .....	3 - 81
3.17.9	What measures are proposed to mitigate the effects of the project? .....	3 - 82
3.18	Archaeological and Historic Resources .....	3 - 82
3.18.1	Why do we study impacts to archaeological and historic resources?.....	3 - 82
3.18.2	Studies, coordination, and methods.....	3 - 83
3.18.3	Are there any archaeological or historic resources in the APE? .....	3 - 84
3.18.4	How would the alternatives affect historic properties? .....	3 - 85
3.18.5	What measures would be taken to minimize effects to archaeological and historical resources? .....	3 - 85
3.18.6	Would the project have unavoidable adverse effects to archaeological and historical resources? .....	3 - 86
3.19	Public Services and Utilities .....	3 - 86
3.19.1	Why do we study impacts to public services and utilities? .....	3 - 86
3.19.2	What public services are in the study area? .....	3 - 86
3.19.3	What utilities are in the study area? .....	3 - 88
3.19.4	Who provides sewer service in the study area? .....	3 - 89
3.19.5	How is stormwater currently treated?.....	3 - 89
3.19.6	Studies, coordination, and methods.....	3 - 89
3.19.7	What effects to public services and utilities would result under the No Build Alternative? .....	3 - 89
3.19.8	How would public services and utilities be affected during construction of the Build Alternative?.....	3 - 90

3.19.9 What other effects would occur to public services and utilities under the Build Alternative after construction?.....	3 - 92
3.19.10 How would we offset the effects to public services and utilities during construction?.....	3 - 92
3.19.11 Would the project have unavoidable adverse effects to public services and utilities?.....	3 - 93
3.20 Visual Quality.....	3 - 94
3.20.1 Why do we consider how a project would impact the visual quality of the study area? .....	3 - 94
3.20.2 What are the existing conditions? .....	3 - 94
3.20.3 Studies, coordination, and methods.....	3 - 94
3.20.4 What criteria are examined when dealing with visual quality? .....	3 - 95
3.20.5 What effects to visual quality would result under the No Build Alternative? .....	3 - 96
3.20.6 How would the Build Alternative affect the existing visual quality? .....	3 - 96
3.20.7 How would visual quality be affected during construction of the Build Alternative?.....	3 - 98
3.20.8 What other effects would occur to visual quality under the Build Alternative after construction?.....	3 - 101
3.20.9 How would we offset the effects to visual quality during construction? .....	3 - 101
3.20.10 Would the project have unavoidable adverse effects to visual quality that would not be fully mitigated?.....	3 - 102
3.21 Geology and Soils .....	3 - 103
3.21.1 What are the potential impacts to geology and soils?.....	3 - 103
3.21.2 Studies, coordination, and methods.....	3 - 103
3.21.3 What are the soil and geologic conditions in the study area? .....	3 - 103
3.21.4 What effect to geology and soil would result under the No Build Alternative? .....	3 - 111
3.21.5 How would geology and soils be affected during construction of the Build Alternative?.....	3 - 111
3.21.6 How much material would be transported to and from the site? .....	3 - 111
3.21.7 What other effects would occur to geology and soils under the Build Alternative after construction?.....	3 - 112

3.21.8 How would the community be protected from earthmoving activities during construction of the Build Alternative? .....	3 - 112
3.21.9 Would the project have unavoidable adverse effects to geology and soil that would not be fully mitigated? .....	3 - 114

**CHAPTER 4: Indirect and Cumulative Effects ..... 4 - 1**

4.1 Introduction.....	4 - 1
4.2 How were indirect and cumulative effects analyzed?.....	4 - 1
4.3 What indirect effects are expected from the Bypass project?.....	4 - 2
4.4 What other transportation projects are known in the area? .....	4 - 3
4.5 What significant developments are known in the area? .....	4 - 4
4.6 What cumulative effects are expected in the area?.....	4 - 5
4.7 What mitigation measures exist or would be proposed for these cumulative effects? ...	4 - 6

**CHAPTER 5: Agency, Tribal, and Public Coordination..... 5 - 1**

5.1 Why does WSDOT coordinate with the agencies, tribes, and the public? .....	5 - 1
5.2 What is the background of coordination regarding the Belfair Bypass? .....	5 - 1
5.3 How has WSDOT involved agencies in the currently proposed project? .....	5 - 3
5.4 How has WSDOT involved tribes?.....	5 - 3
5.5 How has WSDOT involved the public with the currently proposed project?.....	5 - 4

**APPENDICES ..... A - 1**

<b>A. Preliminary Commitments.....</b>	<b>A - 3</b>
<b>B. Discipline Studies and List of Preparers.....</b>	<b>A - 5</b>
<b>C. References .....</b>	<b>A - 7</b>
<b>D. EA Distribution List.....</b>	<b>A - 9</b>
<b>E. Level of Service (LOS).....</b>	<b>A - 11</b>
<b>F. Right of Way Acquisition Process .....</b>	<b>A - 15</b>
<b>G. Wetland Impact Table and Maps .....</b>	<b>A - 17</b>
<b>H. Agency and Tribal Correspondence.....</b>	<b>A - 37</b>
<b>I. Public Involvement.....</b>	<b>A - 63</b>
<b>J. Letter from North Mason School District.....</b>	<b>A - 65</b>

# EXHIBITS

Exhibit 1-1: Vicinity Map..... 1 - 3

Exhibit 2-1: Proposed Belfair Bypass Alignment – South ..... 2 - 2

Exhibit 2-2: Proposed Belfair Bypass Alignment – North..... 2 - 3

Exhibit 3-1: SR 3 Belfair Vicinity Level-of-Service ..... 3 - 6

Exhibit 3-2: South Connection ..... 3 - 10

Exhibit 3-3: North Connection..... 3 - 11

Exhibit 3-4: Sensitive Noise Receptor Map ..... 3 - 18

Exhibit 3-5: Sensitive Noise Receptor Table ..... 3 - 19

Exhibit 3-6: Wetland Map..... 3 - 29

Exhibit 3-7: Water Resources Map..... 3 - 44

Exhibit 3-8: Land Use Map..... 3 - 51

Exhibit 3-9: Section 4(f) resources within one-half mile of the project limits ..... 3 - 60

Exhibit 3-10: Proposed Section 4(f) Impacts..... 3 - 63

Exhibit 3-11: Key Views..... 3 - 97

Exhibit 3-12: Key View 1 – View looking towards the southern entrance of  
North Mason High School from SR 302..... 3 - 98

Exhibit 3-13: Key View 2 – View MP 23.22..... 3 - 99

Exhibit 3-14: Key View 3 – View from Log Yard Rd..... 3 - 99

Exhibit 3-15: Key View 4 – View MP 27.92..... 3 - 100

Exhibit 3-16: Key View 5 – View within existing forested corridor ..... 3 - 100
