

TABLE OF CONTENTS

Summary	vii
Study Approach	vii
Baseline Conditions	vii
Project Effects.....	vii
Measures to Avoid or Minimize Effects.....	viii
Unavoidable Adverse Effects	x
Acronyms and Abbreviations	xi
Glossary	xii
SECTION 1 Introduction	1-1
What are the primary features of the Tukwila to Renton Project?	1-1
What is the purpose of this report?	1-1
What topics are included in water resources?	1-1
Why are water resources important to consider?.....	1-2
Surface Water Flow and Surface Water Quality	1-2
Floodplains	1-2
Groundwater	1-3
What studies were completed?.....	1-3
What are the key messages from this report?	1-4
What measures are proposed to avoid or reduce impacts?	1-5
What will happen if we adopt the No Build Alternative?	1-5
SECTION 2 Project Description	2-1
What is the intent of the Tukwila to Renton Project?	2-1
What are the details of the Tukwila to Renton Project?	2-1
I-405 from I-5 to East of SR 181.....	2-3
I-405 at SR 181 Interchange	2-5
I-405 from East of SR 181 to SR 167 Interchange	2-7
SR 167 from SW 43rd Street On-ramp North to SW 27th Street	2-9
SR 167 from SW 27th Street to I-405	2-11

I-405 Interchange with SR 167	2-13
I-405 from East of SR 167 Interchange to North of S 5th Street.....	2-17
I-405 from S 5th Street to SR 169.....	2-19
Changes to Renton Hill Access	2-22
What are the construction methods and schedule for implementation?	2-23
Construction Methods.....	2-23
Schedule.....	2-24
Does this project relate to any other improvements on I-405 or connecting highways?	2-24
What is the No Build Alternative?	2-26
SECTION 3 Study Approach.....	3-1
What are water resources?.....	3-1
What is the study area and how was it determined?	3-1
What policies or regulations are related to effects on water resources?	3-2
How did we collect information on water resources for this report?	3-3
How did we evaluate effects on water resources?.....	3-5
Surface Water Flow.....	3-5
Surface Water Quality	3-5
Floodplains	3-6
Groundwater	3-6
SECTION 4 Baseline Conditions.....	4-1
What surface waterbodies exist in the study area?.....	4-1
Cottage Creek	4-2
Gilliam Creek	4-2
Unnamed Tributary to Gilliam Creek	4-3
Green River	4-3
Springbrook Creek	4-3
Panther Creek and Wetlands	4-4
Rolling Hills Creek.....	4-4
Unnamed Tributary to Rolling Hills Creek	4-5
Thunder Hills Creek.....	4-5
Unnamed Tributary to Thunder Hills Creek.....	4-5

Cedar River	4-5
What is the water quality of these surface waterbodies?	4-5
How does urbanization affect surface water?	4-7
How is stormwater managed in the study area?	4-8
Detention Ponds.....	4-9
Biofiltration Swales.....	4-10
Ecology Embankments	4-11
Stormwater Cross Culverts.....	4-11
How do environmental regulations affect the stormwater system design for this project?	4-12
What regulated floodplains are associated with the surface waterbodies in the study area?	4-13
What groundwater resources exist in the study area?	4-15
Green-Duwamish Alluvial Aquifer	4-16
Cedar Valley Aquifer and its Subunit, the Delta Aquifer	4-16
How is groundwater used in the study area?	4-19
Groundwater Rights.....	4-19
Groundwater Wells	4-20
What is the quality of these groundwaters?.....	4-20
How is groundwater quality protected?.....	4-21
Critical Aquifer Recharge Areas	4-21
Green-Duwamish Alluvial Aquifer	4-21
Cedar Valley Aquifer.....	4-21
Capture Zones and Travel Times.....	4-22
Aquifer Protection Ordinances.....	4-22
SECTION 5 Project Effects.....	5-1
How will project construction affect water resources?	5-1
Surface Water Flow.....	5-1
Surface Water Quality	5-1
Floodplains	5-2
Groundwater	5-2
How will project operation affect water resources?	5-3

Surface Water Flow.....	5-3
Surface Water Quality.....	5-5
Floodplains.....	5-9
Groundwater.....	5-9
Does the project have other effects on water resources that may be delayed or distant from the study area?.....	5-11
Were potential cumulative effects for water resources considered?	5-11
What effects will occur under the No Build Alternative?	5-12
SECTION 6 Measures to Avoid or Minimize Effects.....	6-1
What measures will be taken to mitigate effects during construction?.....	6-1
Surface Water Flow.....	6-1
Surface Water Quality.....	6-1
Floodplains.....	6-3
Groundwater.....	6-3
What measures will be taken to mitigate effects of operation?	6-6
Surface Water Flow.....	6-6
Surface Water Quality.....	6-7
Floodplains.....	6-7
Groundwater.....	6-8
SECTION 7 Unavoidable Adverse Effects.....	7-1
Does the project cause any substantial adverse effects that cannot be avoided?	7-1
Surface Water Flow.....	7-1
Surface Water Quality.....	7-1
Floodplains.....	7-1
Groundwater.....	7-1
SECTION 8 References.....	8-1
GIS data sources.....	8-1
Text references and verbal communications.....	8-3

EXHIBITS

Exhibit 2-1: Project Features, Sheet 1.....	2-2
Exhibit 2-2: Project Features, Sheet 2.....	2-4
Exhibit 2-3: SR 181 Interchange Improvements	2-5
Exhibit 2-4: Project Features, Sheet 3.....	2-6
Exhibit 2-5: Project Features, Sheet 4.....	2-8
Exhibit 2-6: Project Features, Sheet 5.....	2-10
Exhibit 2-7: Project Features, Sheet 6.....	2-12
Exhibit 2-8: Freeway to Freeway Ramps in Reconstructed I-405/SR 167 Interchange	2-13
Exhibit 2-9: Rendering of I-405/SR 167 Interchange Improvements	2-14
Exhibit 2-10: Split-diamond Interchange at Lind Avenue and Talbot Road	2-15
Exhibit 2-11: Project Features, Sheet 7	2-16
Exhibit 2-12: Project Features, Sheet 8	2-18
Exhibit 2-13: Mill Avenue Design Option for Local Access to Bronson Way.....	2-20
Exhibit 2-14: Main Avenue Design Option for Local Access to Bronson Way....	2-21
Exhibit 2-15: New Local Access for Renton Hill	2-22
Exhibit 3-1: Study Area (stream and river 300 feet upstream and 1,320 feet downstream boundary not shown).....	3-2
Exhibit 4-1: Surface Waters in the Study Area.....	4-1
Exhibit 4-2: Stormwater Facilities under Baseline Conditions in the Study Area.....	4-10
Exhibit 4-3: FEMA 100-year and 500-year Floodplains in the Study Area.....	4-14
Exhibit 4-4: Boundaries of the Cedar Valley Aquifer and its Subunit, the Delta Aquifer, in the Vicinity of the Study Area.....	4-18
Exhibit 4-5: 1-year, 5-year, and 10-year Groundwater Travel Times for the City of Renton's Well Field in the Delta Aquifer Subunit	4-19
Exhibit 4-6: Group A wells in the Study Area	4-20
Exhibit 4-7: Cedar Valley Aquifer Groundwater Protection Zones 1 and 2	4-23
Exhibit 5-1: Threshold Discharge Areas (TDAs) and Proposed Flow Control Facilities	5-4
Exhibit 5-2: Pollutant Removal Efficiencies for BMP Water Quality Facilities	5-5

Exhibit 5-3: Pollutant Loadings for Build and No Build Alternatives
in lbs/year for the Green River Basin 5-6

Exhibit 5-4: Pollutant Loadings for Build and No Build Alternatives
in lbs/year for the Springbrook Creek Basin 5-7

Exhibit 5-5: Pollutant Loadings for Build and No Build Alternatives
in lbs/year for the Cedar River Basin 5-7

Exhibit 5-6: Floodplain Fill Volumes for Each Basin 5-8

Exhibit 5-7: Boundaries of the Cedar Aquifer in the Vicinity
of the Study Area and Protection Zones 1 and 2 5-10

APPENDICES

- APPENDIX A Groundwater Rights Summary
- APPENDIX B Construction Effects for SR 515 Interchange Project
- APPENDIX C Pollutant Loading Calculations
