

**Groundwater**

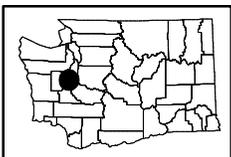

-  Drinking Water Wells in Study Area
-  Critical Aquifer Recharge Areas - Pierce Co. only
-  Sanitary Control Areas

Sanitary Control Areas are zones specified by the WADOH around small public drinking water supply wells, inside which pollutant-generating facilities cannot be constructed without approval by WADOH.

**SR 302 Corridor Study Alternatives 4, 5, 6**

This map is for general planning and management purposes only, and is subject to updates and changes. Any user should check with WSDOT prior to use to be sure that the data is correct. Because of the scale of this map, any user should not rely on it for the exact definition of any boundary or division line shown on this map.
