

# Cedar River Segment: Jones Road to SE 216th Place

### Short-Term Improvements

- S20** SR 169 from Cedar Grove Park (north of 196th Avenue SE) to SR 516 - \$  
Extend the pavement of the Cedar River Trail. (Begins in Renton segment and ends in Maple Valley segment)
- S21** SR 169 near Jones Road/196th Avenue SE vicinity - \$  
Address steep slopes adjacent to roadway and repave damaged pavement.
- S25** SR 169 @ SE 214th Street to SE 216th Place  
Manage access points for vehicles entering and exiting the corridor to address the high accident corridor north of 218th Place SE to south of Witte Road SE.
- S26** SR 169 from SE 216th Place to SR 18 Overpass  
Realign the roadway and remove roadside obstacles to improve driver visibility and address the high accident corridor north of 218th Place SE to south of Witte Road SE.
- S28\*** SR 169 @ SE 216th Place  
Widen and restripe the roadway, remove old guardrail, add new guardrail where it is needed, and increase street signage to address the high accident corridor north of 218th Place SE to south of Witte Road SE.
- S77** SR 169 from SE 216th Place to SR 18 Overpass  
Build a sidewalk in front of the commercial area to address the high accident corridor north of 218th Place SE to south of Witte Road SE.

### Long-Term Improvements

- L18** SR 169 from Jones Road (196th Avenue SE) to SE 231 Street  
Repave the roadway from Jones Road (196th Avenue SE) to SE 231 street.
- L19** SR 169 from Jones Road (196th Avenue SE) to SR 516  
Widen the roadway, consider managing access points for vehicles entering and exiting the corridor, build sidewalks in developed areas, and add bike lanes where parallel trails are not paved or available. Jones Road (196th Avenue SE) is a traffic "bottleneck" location and these projects will address the congestion. (Begins in Cedar River segment and ends in Maple Valley segment)
- L23** SR 169 @ Cedar Grove Road  
Improve the intersection to accommodate future growth and address existing safety issues. Specific intersection improvements will be determined during the project design phase.
- L24** SR 169 south of 196th Avenue SE  
Address steep slopes adjacent to the roadway and repave damaged pavement. Realign roadway to improve driver visibility. Improve the roadway and increase shoulder widths to enhance flow and safety at 196th Avenue SE and to the south. Specific roadway improvements will be determined during the project design phase.

**Legend**

- S Short-Term Improvements
- L Long-Term Improvements
- \$: Funded

Note: Numbers are not in sequential order.

\* Note: These projects are recommended for further analysis and may not be included in the final Route Development Plan
