

SECTION VIII. RELATIONSHIP TO LOCAL CTR PLAN

The Totem Lake GTEC program builds upon the City's existing CTR program. The City will continue to work with major employers in the CTR program to reduce drive alone travel and vehicle miles traveled. In addition to the City's CTR program, the City plans to expand CTR activities to unaffected employers and residential groups.

By expanding the CTR program to Totem Lake through a GTEC program, the City will help improve air quality, reduce traffic congestion on state highways and local streets, and help achieve the goals and vision of the Totem Lake neighborhood plan. Described below is the relationship between the Totem Lake GTEC program and the City's Local CTR plan.

Base CTR Program	GTEC Plan	Expected Benefits
The base CTR program will continue to focus on major employers in Totem Lake. Totem Lake currently has four major employers.	The GTEC program expands efforts to reduce drive alone trips to the following markets: 1) Health Care employees; 2) Totem Lake Mall employees; 3) Residents in Totem Lake; 4) entry level employees.	Additional efforts to reduce drive alone trips will help reduce traffic congestion in Totem Lake, improve air quality and help achieve the goals and vision of the City's Totem Lake sub area plan.
