**RE:** SEPA Determination

**SUBJECT:** WSDOT Statewide Maintenance and Repair of Fishway Structures

WSDOT needs to perform routine maintenance activities to remove debris within in and adjacent to fishway structures. Minor repairs such as replacement of baffles, wiers, and other components of the structures. The work is necessary to insure the fishway structures proper fish movement through the system.

Activities will follow the requirements per WSDOT's permits and agreements with the Department of Fish & Wildlife.

We have evaluated these activities and found the work to be consistent with those activities adopted under SEPA on January 1, 2008 through the NEPA DNS issued to WSDOT by NOAA Fisheries for the Regional Road Maintenance Program.
