**RE:** SEPA Determination

**SUBJECT:** WSDOT Statewide Debris Removal from Bridge Structures

WSDOT needs to perform routine maintenance activities to remove debris adjacent to bridge structures. The work is necessary to minimize structural damage and/or flooding. This includes repositioning or floating of Large Woody Material away from the structure.

Activities will follow the requirements per WSDOT's permits and agreements with the Department of Fish & Wildlife.

We have evaluated these activities and found the work to be consistent with those activities adopted under SEPA on January 1, 2008 through the NEPA DNS issued to WSDOT by NOAA Fisheries for the Regional Road Maintenance Program.
