

How did we identify the Grays Harbor property?

The Industrial Development District Parcel #1 at the Port of Grays Harbor meets several criteria for catastrophic failure planning:

- immediately available.
- at least 30 acres in size.
- sufficient capacity to build several pontoons simultaneously.
- consistency with local land use plans.
- waterfront access.
- access to deep water.
- no known cultural resources.
- no known chemical contamination.
- a 2007 labor study indicated that the region could provide enough skilled workers to complete this project.
