## High-Accident Locations (HALs) and High-Accident Corridors (HACs)

Stretches of highway with accident rates and severity rates significantly higher than statewide average for that type of highway

- HALs: One-quarter mile long or less
- HACs: One mile long or more

Safety analysis revealed no HALs or HACs on this section of SR 7.

Two safety projects have been identified in the Highway System Plan for this section of SR 7.
