### SR 169 Green River Bridge reopens to traffic

You can once again drive over the [Green River Bridge](#) (Kummer Bridge) on SR 169 between Black Diamond and Enumclaw. An unstable slope adjacent to the bridge required a full closure late last month while we did emergency repairs. We [completed those repairs](#) and reopened the bridge to traffic in time for the Fourth of July weekend. Permanent repairs will begin as soon as September, and the bridge will be closed again.
