

Air quality, energy and greenhouse gases

- All options would reduce greenhouse gas emissions compared to the No Build Alternative.
- Option A would provide slightly greater fuel savings than Options K and L due to projected lower vehicle miles traveled in the area.

Weekday Peak Period Greenhouse Gas Emissions

- All options meet air quality standards. Air quality would improve slightly with Options A, K and L due to improved traffic flow and less stop-and-go traffic.
- WSDOT will use best management practices to minimize construction dust and emissions.
