

4 CORNERS INTERSECTION WEEKEND DETOUR FOR TWO WEEKENDS IN MAY EXPECT POTENTIAL LONG DELAYS

The intersection will be paved in portland cement concrete during the weekends of **May 4** and **May 11**. During these two weekends, one half of the intersection will be closed to traffic. This will impact traffic going east and west. Detours will be setup, with uniformed officers at key intersections. Detour maps are shown on the back of this sheet.

West Half. The west half of the intersection will be built first. Traffic will be detoured to 228th Avenue SE and SE 280th Street. The west half of the intersection will be shut down on Friday, May 4 at 7:00 p.m. Work will continue, around the clock, to have the roadway open to traffic for the following Monday, May 7, rush hour at 5:00 a.m.

East Half. The east half of the intersection will follow on the following weekend. Traffic will be detoured around the Safeway complex (on 243rd Avenue / SE 271st Place). The detour will be put in place at 7:00 p.m. on Friday night and will re-open to traffic on Monday morning at 5:00 a.m.

During these two weekend detours, ***long delays can be expected.*** Access to local businesses will be maintained. The City is working with local gravel companies to detour their trucks during these two weekends to minimize traffic. By performing this work over two weekends, the total impact to general traffic will be greatly minimized, and the construction period will be reduced by a number of weeks. The City, and the project contractor (Gary Merlino Construction), greatly appreciates your patience and understanding.

Any delays in this work due to weather will be posted on the lighted message boards at each end of the project and the City's website. If you have any comments or questions, please contact Mike Mathia at the City of Maple Valley at (425) 413-8800 or mike.mathia@ci.maple-valley.wa.us. Additional information about the project can be found at the City's website:
