Re: Access Management, Reference letter Dated 10/3/2007

Dear Ms. Robbins;

Thank you for your letter requesting the requirements the management of access onto state highways. The Town of Darrington does not have any current adopted ordinances in regards WSDOT access requirements onto SR 530 between mileposts 48.29 and 50.08. All submittals for construction activity or access onto SR 530 have always been submitted to WSDOT for review and approval prior to issuance of a permit or occupancy of the facility. Any comments or additional requirements have always been forwarded to the developer for compliance.

As the Town of Darrington is required to be the permitting authority for this portion of SR 530, we will concur with your request to draft and adopt regulations and standards that are consistent with the Town of Darrington's current street standards and Chapter 468-51 WAC for the management of access on to state highways.

I hope this letter suffices your needs to comply with the State legislature request. If there is anything additional I may be of help to you with, please call.

Sincerely,

Merle McCaulley
Maintenance Supervisor
Town of Darrington
