

Transportation Research Innovations is a series of webinars to bring researchers and interested folks together to discuss innovative strategies, technologies and information that are helping WSDOT achieve its mission. The featured topics are derived from the hard work and investments we make in research.

Improving Wildlife Crossings and Traveler Safety Webinar

August 16, 2011

Kelly McAllister, Wildlife Habitat Biologist

<mms://Video/Wildlife-Crossings/Wildlife-Crossings.wmv>

WSDOT's research on habitat connectivity allows Washington's vast wildlife resources to cross highways safely for their protection and the traveling public.
