**SECTION B  
DETAILING PROGRESS TOWARD ADOPTING REQUIRED STANDARDS:**

Please briefly describe (1) why your jurisdiction has not yet adopted the required access permitting standards for managed access state highways within city boundaries, (2) where your jurisdiction is in the process of adopting the required standards, and (3) what date you anticipate the required standards will be adopted.

The City of Kent is currently in the process of reviewing design standards for transportation facilities. The City has nearly completed a two year long process of reviewing and updating the Transportation Master Plan (TMP). The TMP was presented to the Public Works Committee on 1/7/08, resulting in the Committee recommending approval and adoption by the City Council. As one of the implementation measures, the City will complete thorough review of all design and construction standards consistent with the TMP and recommend changes, as appropriate. It is anticipated that access management standards will be reviewed resulting in modifications to the standards and clarification to the application of the standards. We anticipate developing standards for managed access State highways, per RCW 47.050, and WAC 468-51, and presenting the standards to the City Council for adoption. Pending the required 60 day CTED review, we anticipate adopting required standards by December 20, 2008.
