Attached is the new Give'Em Brake (G28-101) Construction Sign design. Based on citizen and regional feedback, the existing sign design had the resemblance of a large arrow to the right, especially at night. The new sign design eliminated the two sign piece assembly, and now has only one continuous outside rectangular shape. The new sign design will be incorporated into the next Sign Fabrication Manual (M55-05) update.

Please pass the new sign design onto designers who are preparing traffic control plans for P.S.&E. projects. *We are requesting any project going to ad after April 30, 1999, incorporate the new design.* Beginning immediately, the WSDOT Central Sign Shop will be fabricating the new design for state provided Give'Em Brake signs.

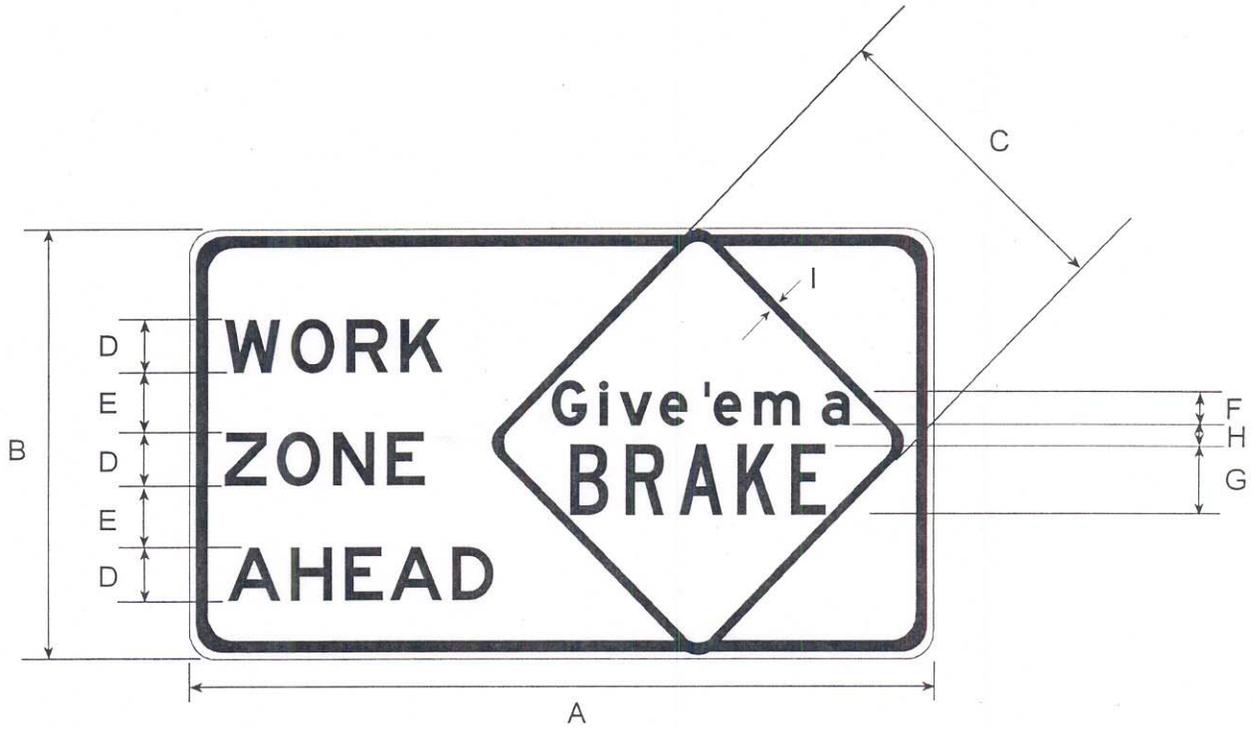

If you have any questions, please contact Rick Mowlds at (360) 705-7988.
