

# 520 Tolling Implementation Committee Independent Peer Review--Next Steps

**August 12, 2008**

## Recommendations from Peer Review

- **Conduct a more detailed review of results, including focus on target corridor**
- **Run the model under different assumptions, including:**
  - fixed trip table**
  - sensitivity analysis**
- **Improve model consistency, including:**
  - values of time**
  - operating costs in trip distribution**
- **Include strategic recommendations for future work**
  - stated preference survey**
  - corridor specific analysis**
- **State results in ranges to account for uncertainty**

## Peer Review Next Steps

- **Run sensitivity analysis of peer review recommendations against a one bridge and a two bridge scenario**
- **Conduct analysis of future scenarios using consistent value of time in different sub modules.**
- **Begin work on incorporating operating cost modification into the model**
- **Examine how and when to conduct a stated preference survey as part of more detailed scenario analysis**
- **Use the sensitivity analysis to gain better understanding of uncertainty in forecasting and present results in ranges**
