## March 7

Preparing for the SR 99 Tunneling Machine's Arrival  
*Greg Hauser, Seattle Tunnel Partners Deputy Project Executive*

**6 to 6:30 p.m.**

Bertha, the world's largest-diameter tunnel boring machine, is being shipped from Japan to Seattle this spring. Before she arrives, join us for an engaging discussion about how crews will transport her 40-some pieces from a ship at the Port of Seattle to the 80-foot-deep pit to the west of the stadiums where she'll begin tunneling this summer. You'll also get a sneak peek at the support facilities we're building near the launch pit, including a soil-removing conveyor belt that will stretch a whopping two miles by the end of construction.

Free parking is available for First Thursday art walk patrons in Pioneer Square.  
Visit [www.FirstThursdaySeattle.com](http://www.FirstThursdaySeattle.com) for more information about participating garages.
