

CHAPTER V

COORDINATED PLANNING

1. THE COORDINATED PUBLIC TRANSIT-HUMAN SERVICES TRANSPORTATION PLAN. Federal transit law, as amended by SAFETEA-LU, requires that projects selected for funding under the Section 5310, Job Access and Reverse Commute (JARC), and New Freedom programs be “derived from a locally developed, coordinated public transit-human services transportation plan” and that the plan be “developed through a process that includes representatives of public, private, and non-profit transportation and human services providers and participation by members of the public.” The experiences gained from the efforts of the Federal Interagency Coordinating Council on Access and Mobility (CCAM), and specifically the United We Ride (UWR) Initiative, provide a useful starting point for the development and implementation of the local public transit-human services transportation plan required under the Section 5310, JARC, and New Freedom programs. Many States have established UWR plans that may form a foundation for a coordinated plan that includes the required elements outlined in this chapter and meets the requirements of 49 U.S.C. 5310.
2. DEVELOPMENT OF THE COORDINATED PUBLIC TRANSIT-HUMAN SERVICES TRANSPORTATION PLAN.
 - a. Overview. A locally developed, coordinated public transit-human services transportation plan (“coordinated plan”) identifies the transportation needs of individuals with disabilities, older adults, and people with low incomes, provides strategies for meeting those local needs, and prioritizes transportation services for funding and implementation. Local plans may be developed on a local, regional, or statewide level. The decision as to the boundaries of the local planning areas should be made in consultation with the State and the metropolitan planning organization (MPO), where applicable. The agency leading the planning process is decided locally and does not have to be the State.

A coordinated plan should maximize the programs’ collective coverage by minimizing duplication of services. Further, a coordinated plan shall be developed through a process that includes representatives of public and private and non-profit transportation and human services transportation providers, and participation by members of the public. Members of the public should include representatives of the targeted population(s) including individuals with disabilities, older adults, and people with low incomes. While the plan is only required in communities seeking funding under one or more of the three specified FTA programs, a coordinated plan should also incorporate activities offered under other programs sponsored by Federal, State, and local agencies to greatly strengthen its impact.

- b. Required Elements. Projects shall be derived from a coordinated plan that minimally includes the following elements at a level consistent with available resources and the complexity of the local institutional environment:
- (1) An assessment of available services that identifies current transportation providers (public, private, and non-profit);
 - (2) An assessment of transportation needs for individuals with disabilities, older adults, and people with low incomes. This assessment can be based on the experiences and perceptions of the planning partners or on more sophisticated data collection efforts, and gaps in service (Note: If a community does not intend to seek funding for a particular program (Section 5310, JARC, or New Freedom), then the community is not required to include an assessment of the targeted population in its coordinated plan);
 - (3) Strategies, activities, and/or projects to address the identified gaps between current services and needs, as well as opportunities to achieve efficiencies in service delivery; and
 - (4) Priorities for implementation based on resources (from multiple program sources), time, and feasibility for implementing specific strategies and/or activities identified.

Note: FTA will consider plans developed before the issuance of final program circulars to be an acceptable basis for project selection for FY 2007 if they meet minimum criteria. Plans for FY 2007 should include 1) an assessment of available services; 2) an assessment of needs; and 3) strategies to address gaps for target populations; however, FTA recognizes that initial plans may be less complex in one or more of these elements than a plan developed after the local coordinated planning process is more mature. Addendums to existing plans to include these elements will also be sufficient for FY 2007. Plans must be developed in good faith in coordination with appropriate planning partners and with opportunities for public participation.

- c. Local Flexibility in the Development of a Local Coordinated Public Transit-Human Services Transportation Plan. The decision for determining which agency has the lead for the development and coordination of the planning process should be made at the State, regional, and local levels. FTA recognizes the importance of local flexibility in developing plans for human service transportation. Therefore, the lead agency for the coordinated planning process may be different from the State or the agency that will serve as the designated recipient for JARC and/or New Freedom. Further, FTA recognizes that many communities have conducted assessments of transportation needs and resources regarding individuals with disabilities, older adults, and/or people with low incomes. FTA also recognizes that some communities have taken steps to develop a comprehensive, coordinated, human service transportation plan either independently or through United We Ride efforts. FTA supports communities building on existing

assessments, plans, and action items. As all new Federal requirements must be met, however, communities may need to modify their plans or processes as necessary to meet these requirements. FTA encourages communities to consider inclusion of new partners, new outreach strategies, and new activities related to the targeted programs and populations.

Plans will vary based upon the availability of resources and the existence of populations served under these programs. A rural community may develop its plans based on perceived needs emerging from the collaboration of the planning partners, whereas a large urbanized community may use existing data sources to conduct a more formal analysis to define service gaps and identify strategies for addressing the gaps.

This type of planning is also an eligible activity under three other FTA programs—the Metropolitan Planning (Section 5303), Statewide Planning (Section 5304), and Urbanized Area Formula (Section 5307) programs, all of which may be used to supplement the limited (10 percent) planning and administration funding under this program. Other resources may also be available from other entities to fund coordinated planning activities. All “planning” activities undertaken in urbanized areas, regardless of the funding source, must be included in the Unified Planning Work Program (UPWP) of the applicable MPO.

- d. Tools and Strategies for Developing a Coordinated Plan. States and communities may approach the development of a coordinated plan in different ways. The amount of available time, staff, funding, and other resources should be considered when deciding on specific approaches. The following is a list of potential strategies for consideration:
 - (1) Community planning session. A community may choose to conduct a local planning session with a diverse group of stakeholders in the community. This session would be intended to identify needs based on personal and professional experiences, identify strategies to address the needs, and set priorities based on time, resources, and feasibility for implementation. This process can be done in one meeting or over several sessions with the same group. It is often helpful to identify a facilitator to lead this process. Also, as a means to leverage limited resources and to ensure broad exposure, this could be conducted in cooperation, or coordination, with the applicable metropolitan or statewide planning process.
 - (2) Self-assessment tool. *The Framework for Action: Building the Fully Coordinated Transportation System*, developed by FTA and available at www.unitedweride.gov, helps stakeholders realize a shared perspective and build a roadmap for moving forward together. The self-assessment tool focuses on a series of core elements that are represented in categories of simple diagnostic questions to help groups in States and communities assess their progress toward transportation coordination based on standards of excellence. There is also a *Facilitator’s Guide* that offers detailed advice on how to choose an existing group or construct an ad hoc group. In addition, it describes how to develop elements of

a plan, such as identifying the needs of targeted populations, assessing gaps and duplications in services, and developing strategies to meet needs and coordinate services.

- (3) Focus groups. A community could choose to conduct a series of focus groups within communities that provides opportunity for greater input from a greater number of representatives, including transportation agencies, human service providers, and passengers. This information can be used to inform the needs analysis in the community. Focus groups also create an opportunity to begin an ongoing dialogue with community representatives on key issues, strategies, and plans for implementation.
 - (4) Survey. The community may choose to conduct a survey to evaluate the unmet transportation needs within a community and/or available resources. Surveys can be conducted through mail, e-mail, or in-person interviews. Survey design should consider sampling, data collection strategies, analysis, and projected return rates. Surveys should be designed taking accessibility considerations into account, including alternative formats, access to the Internet, literacy levels, and limited English proficiency.
 - (5) Detailed study and analysis. A community may decide to conduct a complex analysis using inventories, interviews, Geographic Information Systems (GIS) mapping, and other types of research strategies. A decision to conduct this type of analysis should take into account the amount of time and funding resources available, and communities should consider leveraging State and MPO resources for these undertakings.
3. PARTICIPATION IN THE COORDINATED PUBLIC TRANSIT-HUMAN SERVICES TRANSPORTATION PLANNING PROCESS. States shall certify that the coordinated plan was developed through a process that included representatives of public, private, and non-profit transportation and human services providers, and participation by members of the public. Note that the required participants include not only transportation providers but also providers of human services, and members of the public (e.g., individuals with disabilities, older adults, and individuals with low incomes) who can provide insights into local transportation needs. It is important that stakeholders be included in the development and implementation of the local coordinated public transit-human services transportation plan. A planning process in which stakeholders provide their opinions but have no assurance that those opinions will be considered in the outcome does not meet the requirement of “participation.” Explicit consideration and response should be provided to public input received during the development of the coordinated plan. Stakeholders should have reasonable opportunities to be actively involved in the decision-making process at key decision points, including, but not limited to, development of the proposed coordinated plan document. The following possible strategies facilitate appropriate inclusion:

- a. Adequate Outreach to Allow for Participation. Outreach strategies and potential participants will vary from area to area. Potential outreach strategies could include notices or flyers in centers of community activity, newspaper or radio announcements, e-mail lists, website postings, and invitation letters to other government agencies, transportation providers, human services providers, and advocacy groups. Conveners should note that not all potential participants have access to the Internet and they should not rely exclusively on electronic communications. It is useful to allow many ways to participate, including in-person testimony, mail, e-mail, and teleconference. Any public meetings regarding the plan should be held in a location and time where accessible transportation services can be made available and adequately advertised to the general public using techniques such as those listed above. Additionally, interpreters for individuals with hearing impairments and English as a second language and accessible formats (e.g., large print, Braille, electronic versions) should be provided as required by law.
- b. Participants in the Planning Process. Metropolitan and statewide planning under 49 U.S.C. 5303 and 5304 require consultation with an expansive list of stakeholders. There is significant overlap between the lists of stakeholders identified under those provisions (e.g. private providers of transportation, representatives of transit users, and representatives of individuals with disabilities) and the organizations that should be involved in preparation of the coordinated plan.

The projects selected for funding under the Section 5310, JARC, and New Freedom programs must be “derived from a locally developed, coordinated public transit-human services transportation plan” that was “developed through a process that includes representatives of public, private, and non-profit transportation and human services providers and participation by members of the public.” The requirement for developing the local public transit-human services transportation plan is intended to improve services for people with disabilities, older adults, and individuals with low incomes. Therefore, individuals, groups, and organizations representing these target populations should be invited to participate in the coordinated planning process. Consideration should be given to including groups and organizations such as the following in the coordinated planning process if present in the community:

- (1) Transportation partners:
 - (a) Area transportation planning agencies, including MPOs, Councils of Government (COGs), Rural Planning Organizations (RPOs), Regional Councils, Associations of Governments, State Departments of Transportation, and local governments;
 - (b) Public transportation providers (including Americans with Disabilities Act (ADA) paratransit providers and agencies administering the projects funded under FTA urbanized and nonurbanized programs);

- (c) Private transportation providers, including private transportation brokers, taxi operators, van pool providers, school transportation operators, and intercity bus operators;
 - (d) Non-profit transportation providers;
 - (e) Past or current organizations funded under the Section 5310, JARC, and/or the New Freedom programs; and
 - (f) Human service agencies funding, operating, and/or providing access to transportation services.
- (2) Passengers and advocates:
- (a) Existing and potential riders, including both general and targeted population passengers (individuals with disabilities, older adults, and people with low incomes);
 - (b) Protection and advocacy organizations;
 - (c) Representatives from independent living centers; and
 - (d) Advocacy organizations working on behalf of targeted populations.
- (3) Human service partners:
- (a) Agencies that administer health, employment, or other support programs for targeted populations. Examples of such agencies include but are not limited to Departments of Social/Human Services, Employment One-Stop Services, Vocational Rehabilitation, Workforce Investment Boards, Medicaid, Community Action Programs (CAP), Agency on Aging (AoA); Developmental Disability Council, Community Services Board;
 - (b) Non-profit human service provider organizations that serve the targeted populations;
 - (c) Job training and placement agencies;
 - (d) Housing agencies;
 - (e) Health care facilities; and
 - (f) Mental health agencies.
- (4) Other:
- (a) Security and emergency management agencies;

- (b) Tribes and tribal representatives;
- (c) Economic development organizations;
- (d) Faith-based and community-based organizations;
- (e) Representatives of the business community (e.g., employers);
- (f) Appropriate local or State officials and elected officials;
- (g) School districts; and
- (h) Policy analysts or experts.

Note: Participation in the planning process will not bar providers (public or private) from bidding to provide services identified in the coordinated planning process. This planning process differs from the competitive selection process (required for JARC and New Freedom projects), and it differs from the development and issuance of a Request for Proposal (RFP) as described in the common grant rule (49 CFR part 18).

- c. Levels of Participation. The suggested list of participants above does not limit participation by other groups, nor require participation by every group listed. Communities will have different types of participants depending on population and size of community, geographic location, and services provided at the local level. FTA expects that planning participants will have an active role in the development, adoption, and implementation of the plan. Participation may remain low even though a good faith effort is made by the lead agency to involve passengers, representatives of public, private, and non-profit transportation and human services providers, and others. The lead agency convening the coordinated planning process should document the efforts it utilized, such as those suggested above, to solicit involvement.

In addition, Federal, State, regional, and local policy makers, providers, and advocates should consistently engage in outreach efforts that enhance the coordinated process because it is important that all stakeholders identify the opportunities that are available in building a coordinated system. To increase participation at the local levels from human service partners, State Department of Transportation offices are encouraged to work with their partner agencies at the State level to provide information to their constituencies about the importance of partnering with human service transportation programs and the opportunities that are available through building a coordinated system.

- d. Adoption of a Plan. As a part of the local coordinated planning process, the lead agency in consultation with participants should identify the process for adoption of the plan. A strategy for adopting the plan could also be included in the State's State Management Plan (PMP) further described in Chapter VII.

FTA will not formally review and approve plans. The State's grant application (see Appendix A) will document the plan from which each project listed is derived, including the lead agency, the date of adoption of the plan, or other appropriate identifying information. This may be done by citing the section of the plan or page references from which the project is derived.

4. RELATIONSHIP TO OTHER TRANSPORTATION PLANNING PROCESSES.

- a. Relationship Between the Coordinated Planning Process and the Metropolitan and Statewide Transportation Planning Processes. The coordinated plan may either be developed separately from the metropolitan and statewide transportation planning processes and then incorporated into the broader plans, or be developed as a part of the metropolitan and statewide transportation planning processes. If the coordinated plan is not prepared within the broader process, the lead agency for the coordinated plan should ensure coordination and consistency between the coordinated planning process and metropolitan or statewide planning processes. For example, planning assumptions should not be inconsistent.

Projects identified in the coordinated planning process, and selected for FTA funding must be incorporated into both the Transportation Improvement Program (TIP) and Statewide Transportation Improvement Program (STIP) in urbanized areas with populations of 50,000 or more; and incorporated into the STIP for nonurbanized areas under 50,000 in population.

The lead agency developing the coordinated plan should communicate with the relevant MPOs or State planning agencies at an early stage in plan development. States with coordination programs may wish to incorporate the needs and strategies identified in local coordinated plans into statewide coordination plans.

Depending upon the structure established by local decision-makers, the coordinated planning process may or may not become an integral part of the metropolitan or statewide transportation planning processes. State and local officials should consider the fundamental differences in scope, time horizon, and level of detail between the coordinated planning process and the metropolitan and statewide transportation planning processes. However, there are important areas of overlap between the planning processes, as well. Areas of overlap represent opportunities for sharing and leveraging resources between the planning processes for such activities as: (1) needs assessments based on the distribution of targeted populations and locations of employment centers, employment-related activities, community services and activities, medical centers, housing, and other destinations; (2) inventories of transportation providers/resources, levels of utilization, duplication of service and unused capacity; (3) gap analysis; (4) any eligibility restrictions; and (5) opportunities for increased coordination of transportation services. Local communities may choose the method for developing plans that best fits their needs and circumstances.

- b. Relationship Between the Requirement for Public Participation in the Coordinated Plan and the Requirement for Public Participation in Metropolitan and Statewide Transportation Planning. SAFETEA-LU strengthened the public participation requirements for metropolitan and statewide transportation planning. Title 49 U.S.C. 5303(i)(5) and 5304(f)(3), as amended by SAFETEA-LU, require MPOs and States to engage the public and stakeholder groups in preparing transportation plans, TIPs, and STIPs. “Interested parties” include, among others, affected public agencies, private providers of transportation, representatives of users of public transportation, and representatives of older adults and individuals with disabilities.

MPOs and/or States may work with the lead agency developing the coordinated plan to coordinate schedules, agendas, and strategies of the coordinated planning process with metropolitan and statewide planning in order to minimize additional costs and avoid duplication of efforts. MPOs and States must still provide opportunities for participation when planning for transportation related activities beyond the coordinated public transit-human services transportation plan.

- c. Cycle and Duration of the Coordinated Plan. At a minimum, the coordinated plan should follow the update cycles for metropolitan transportation plans (MTPs) (i.e., four years in air quality nonattainment and maintenance areas and five years in air quality attainment areas). However, communities and States may update the coordinated plan to align with the competitive selection process that is required for JARC and New Freedom projects based on needs identified at the local levels. States, MPOs, designated recipients, and public agencies that administer or operate major modes of transportation should set up a cycle that is conducive to and coordinated with the metropolitan and statewide planning processes, to ensure that selected projects are included in the TIP and STIP, to receive funds in a timely manner.
- d. Role of Transportation Providers that Receive FTA Funding Under the Urbanized and Other Than Urbanized Formula Programs in the Coordinated Planning Process. Recipients of Section 5307 and Section 5311 assistance are the “public transit” in the public transit-human services transportation plan and their participation is assumed and expected. Further, 49 U.S.C. 5307(c)(5) requires that, “Each recipient of a grant shall ensure that the proposed program of projects (POP) provides for the coordination of public transportation services ... with transportation services assisted from other United States Government sources.” In addition, 49 U.S.C. 5311(b)(2)(C)(ii) requires the Secretary of DOT to determine that a State’s Section 5311 projects “provide the maximum feasible coordination of public transportation service ... with transportation service assisted by other Federal sources.” Finally, under the Section 5311 program, States are required to expend 15 percent of the amount available to support intercity bus service. FTA expects the coordinated planning process in rural areas to take into account human service needs that require intercity transportation.
