Ranking projects in the Coordination Plan

Alternatives for making ranking decisions:

A. Project addresses area of greatest need
   • Most “hits” on a customer survey
   • Most “hits” on a provider/agency survey
   • Geographic area where there are few or no providers
   • Geographic area where the greatest number of people need a particular service

B. Project is most cost effective
   • Serves the most people for the least money
   • The expected benefits are the greatest for the amount of money expended
   • The most use is made of existing resources to deliver a new service
   • The project will reduce costs in the long run

C. Project demonstrates the greatest amount of coordination among partners
   • Most partners are involved
   • Leverages the most funds from partnerships
   • Service to clients is most coordinated/integrated
   • Administration is the most coordinated/integrated
