

Integrated Data Collection System

WSDOT has multiple reporting needs. In the past, each report's data has been treated separately and maintained in its own file system or database. However, data required for most reports overlap. WSDOT is in the process of integrating these separate data archives into one database. An integrated database will streamline data sharing and reduce the burden on the state as well as transportation providers in collecting and reporting the data.

Reports	Reporting Frequency	Performance Data	Contact Data
FTA's National Transit Database	Annually	✓	✓
ACCT Report to the Legislature	Biennially	✓	✓
<i>Washington State Summary of Public Transportation</i>	Annually	✓	✓
Travel Option (a.k.a. Trip Planner) Profiles	On Going		✓
PT&CO Directory	Annually		✓
Grants	Quarterly & Annually	✓	✓
