1. An eight-way expanding anchor may be used as an acceptable alternate to power installed helical screw anchor.

2. If anchor hole diameter is greater than nominal diameter of folded anchors, a 5" (ft) cover of 6"-in to 12"-in size rock shall be tamped in to replace the disturbed soil immediately above the anchor.

3. See Standard Plans J-27.10 and J-27.15 for Type IV or Type V Strain Pole details not shown.

4. Strandwise or Guy Wrap may be used.
