

1 (January 5, 2004)  
2 The HMA overlay shall be feathered to produce a smooth riding connection to the  
3 existing pavement.  
4  
5 HMA utilized in the construction of the feathered connections shall be modified by  
6 eliminating the coarse aggregate from the mix at the Contractor's plant or the  
7 commercial source or by raking the joint on the roadway, to the satisfaction of the  
8 Engineer.
