

1 (January 3, 2017)  
2 The expected percentage of new asphalt binder in the HMA is \*\*\* \$\$1\$\$ \*\*\*. Should the  
3 actual percentage of new asphalt binder required by the job mix formula for HMA  
4 produced with Agency-provided aggregate vary by more than plus or minus 0.3-percent  
5 an adjustment in payment will be made. The adjustment in payment (plus or minus) will  
6 be based on the invoice cost to the Contractor. When RAP and/or RAS are used in the  
7 production of HMA the adjustment will be reduced by the percentage of RAP and/or  
8 RAS asphalt binder. No adjustment will be made when the Contractor elects not to use  
9 a Contracting Agency provided source.
