

1 (June 26, 2000)  
2 If, in the opinion of the Engineer, water conditions at the time of construction  
3 do not require seals for construction, the Engineer may specify that the seals  
4 be omitted. In such a case, the Contractor shall excavate only to the bottom of  
5 footing elevation and shall construct the footing as shown in the Plans.  
6  
7 No adjustment will be allowed in the unit contract prices for concrete, steel  
8 reinforcing bar, and excavation by reason of any increase or decrease in  
9 quantities involved due to the deletion of seals.
