

1 (August 3, 2015)  
2 All concrete located below the permanent location of the steel girders shall be  
3 completely covered to protect the concrete from staining from rusty water.  
4  
5 The Contractor shall submit a Type 2 Working Drawing consisting of a concrete  
6 surface protection plan. The submittal shall include, but not be limited to,  
7 describing all material components of the surface protection system, including  
8 material specifications and thicknesses of all components, dimensions of all sub-  
9 units and details of how the sub-units are assembled to create the combined  
10 system, the method of installing the system, including all means of fastening the  
11 system to or holding the system against the concrete surfaces, the methods of  
12 maintaining the system in place during superstructure construction, and the  
13 methods of repairing damage to the system during superstructure construction.  
14  
15 Removal of the concrete surface protection system will be performed by  
16 Contracting Agency forces at a later date.
