

1 (August 3, 2009)
2 Spray painting will be permitted for the application of paint to the surfaces of
3 the steel grid roadway decking and steel grid catwalks, provided every
4 precaution or means necessary to prevent any damage due to spraying
5 operations or from wind borne paint is taken, provided further that if
6 satisfactory results are not, in the opinion of the Engineer, obtained with the
7 spraying application, the Contractor shall revert to the use of brushes. In the
8 event spray painting is used on the steel grid roadway decking, the application
9 shall be made only from the underside of the roadway, and then only at such
10 times as traffic has been diverted to other lanes. A protective covering shall be
11 placed immediately over areas of the roadway decking being spray painted to
12 prevent damage from wind borne paint.
