

1 (January 7, 2002)  
2 The Contractor may use either fly ash modified concrete (FMC), latex modified  
3 concrete (LMC), or microsilica modified concrete (MMC) for the concrete overlay.  
4 The Contractor shall select one type of concrete for the overlay, provide a mix for  
5 the selected concrete to the Engineer in accordance with Item 5 of Section 6-  
6 09.3(2), and use that type for the total concrete overlay operation. Use of a  
7 combination of types will not be allowed.
